CONTENT

The Blue Angel is the ecolabel of the federal government of Germany since 1978. Products and services that have been awarded the Blue Angel ecolabel are more environmentally-friendly than other comparable, standard products and services. The requirements set by the Blue Angel place a particular focus on examining the impact that products and services have on the environment: on the climate, resources, water, soil and air. These tests also focus on their impact on people.

We offset CO₂ emissions of our workbooks with certified climate-protection projects. To that end, all CO₂ emission sources are measured. That includes paper pulp, paper production, as well as printing plates and ink that are used for printing. CO₂ emissions that are created in printing are offset by certified climate-protection projects in other areas. Every order entered has an individual tracking number that is integrated into the upper logo. With this ID, the climate neutrality of the printed product from the point of ordering to the offset with CO₂ can be traced.

VIBRAM® MEGAGRIP

The new high-performance rubber
compound featuring unparalleled grip
on wet and dry surfaces, rugged longevity
and optimal ground adaptability.

VIBRAM® LITEBASE

VIBRAM® Litebase is an innovative technology that
drastically reduces the weight of the sole through a re-
duction in the thickness of the rubber bottom. The pattern
and the shape of the lugs, however, remains unchanged,
thus maintaining the same level of performance.

VIBRAM® Litebase allows for a reduction of about 40–50% in
thickness – from 1.7 mm to 0.5 / 0.9 mm depending on the type
of sole – with a subsequent reduction in the weight of the tread by
25–30%. The substantial reduction of the thickness of the rubber bot-
tom does not affect the sole nor increase the risk of cracks or splits. The
result is a very light sole with patterns identical to those of a traditional
VIBRAM® sole, thus offering the same properties of traction, durability and
resistance to wear and tear.

POMOCA –

70 YEARS OF SOLE MAKING HISTORY

The newly developed rubber compound and outsole
construction provide optimum traction for a smooth,
energy-efficient gait. Its biomechanical design promotes
a natural motion of the foot and prevents dirt and rocks
from lodging in the tread and sticking to lugs.

FEATURES OF ALL DYNAFIT SHOES

DNA (PRECISE VOLUME)

Full control and sensitivity. Tight and precise
like a glove to perform at a high level. Very low
shoe volume.

MEDIUM VOLUME

Wrapping effect but without any constraints in
order to keep a high versatility of usage. Medium
shoe volume.

MAXIMUM VOLUME

Stability and comfort. More space for a proper
blood circulation on longer distances.
Maximum shoe volume.

HEEL PRELOADER

The heel preloader construction ensures comfort and preci-
sion support. Diagonal reinforcements at the heel support the
foot during the running gait and improve fit in the heel area.

64051 ULTRA 100

NEW 7799 dawn/black out

0958 black out/nimbus

8962 poseidon/methyl blue

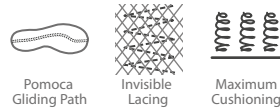

8968 poseidon/fluo yellow

Weight: 310 g
Size: 6-12, 13 UK

SKY DNA

The DYNAFIT SKY DNA is the lightest, most responsive and fastest Trail Running shoe in the collection. The model was developed especially for challenging Sky Races and makes you faster on the mountain.

SKY DNA M
M 64070_9725

SKY DNA W
W 64071_6071

MAXIMUM BREATHABILITY

The lightweight upper features an open-mesh construction for maximum breathability.

LESS IS MORE

The SKY DNA forgoes a footbed to give athletes a better feel for the ground on any terrain.

VIBRAM® LITEBASE MEGAGRIP SOLE

The Vibram® Megagrip outsole with its Litebase technology guarantees maximum performance and best grip even on challenging terrain. The SKY DNA has a totally new, snug, precision fit that perfectly envelops the midfoot. In the toe box, the shoe offers more room to guarantee ideal stability and control on speedy downhill.

PEBAX POWERED® REACTIVE MIDSOLE TECHNOLOGY

The new Pebax® midsole ensures maximum energy return so you can fully utilize the power and speed in your legs. At the same time, its weight has been reduced by 30%*.

*compared to normal EVA foam

DOUBLE SPEED LACING SYSTEM

For a precise, firm fit, the Double Speed Lacing System ensures the shoe can be adapted with precision to your foot's anatomy and your needs. It distributes pressure optimally across the entire foot so no pressure points are created during a run.

64070 SKY DNA

NEW

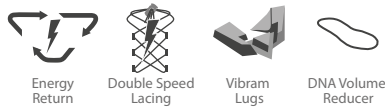

9725 orange/black out

Weight: 239 g
Size: 6-12, 13 UK
Drop: 4 mm
Fit: DNA - Precise Volume

The new Trail Running shoe in the DYNAFIT DNA family is extremely responsive, ultralight, and was developed especially to win Sky Races.

BEST FOR
- Sky Racing

GORE-TEX - PROVEN COMFORT AND PROTECTION

The integrated waterproof GORE-TEX membrane ensures your feet always stay dry in adverse conditions or on wet terrain – from the outside and from the inside.

DURABLY WATERPROOF

OPTIMIZED BREATHABILITY

SPEED LACE + PRECISION FIT LACING SYSTEM

Together with its supportive cage structure, the quick lacing system offers ideal support in the forefoot and a precision fit for alpine terrain. An extra quick-lace hook allows the shoe to offer an even more exacting fit, also making it suitable for climbing sections or via ferrata.

TOE BUMPER + HEEL PRELOADER: MORE PROTECTION FOR CHALLENGING TERRAIN

The Transalper GTX is geared toward the best possible protection. The toe cap, i.e. toe bumper, reduces the effect of impact to the toe and forefoot area while at the same time improving the long-lasting durability of the shoe.

The heel preloader ensures a firm and secure fit at the heel and thus offers optimum stability.

HIGH-PERFORMANCE GRIP IN ANY WEATHER VIBRAM® MEGAGRIP SOLE

The VIBRAM Megagrip soles high-performance rubber compound provides the best grip on both dry and wet surfaces. It is durably long-lasting and adapts to any terrain.

ORTHOLITE® FOOTBED WITH HYBRID TECHNOLOGY™

The lightweight footbed enables maximum energy return at the forefoot. The U-shaped construction of the sole made of 98% recycled materials guarantees more stability on downhill.

TRAIL RUNNING

Mountain runs, running over alpine terrain... this is Trail Running. Whether steep vertical climbs, ultra distances, or simply diverse and technical trails with roots, mud and scree - Trail Running athletes have one thing in common: They move fast and light in the mountains. The challenge for gear is clear: Intelligently lightweight, athletic fit, long-lasting durability, and reliable performance and protection for the athlete. Simply put - Trail Running athletes demand products with an outstanding performance-to-weight ratio for any kind of alpine terrain.

FROM WASTE TO WEARABLES

WE USED TO BE A BOTTLE.

Our mission is to equip passionate mountaineers with innovative, high-quality products for unforgettable experiences outdoors. In the process, it is also of course natural for us to take on responsibility – for the safety of athletes who are out on the mountains with DYNAFIT, as well as for our environment and fellow human beings. For these reasons, we have taken on the goal to constantly increase the percent of recycled content in our collection. For the 2022 Summer Collection, we project we will recycle 1,100,000 PET bottles and turn them into new products – and that is already double the number of bottles we re-purposed in Winter 21/22.

The new Summer Collection has 37 styles that are marked in the workbook with the icon “Made with Recycled Content.” This designation is what products get only when they have a minimum of 50% recycled content. All technical shirts, with the exception of the S-Tech Shirts, consist of at least 55% recycled materials.

The Alpine Shirt and the Alpine Visor Band, both pictured here in the photo, are particularly impressive with each made with 100% of recycled content.

ULTRA

SYSTEM

When it comes to ultrarunning, you always have to be prepared. Not only can the terrain be quite varied, but also the weather can at any time take a turn during a long day on the trails. The light, high-performance products in the Ultra Line offer long-lasting comfort and protection from the first step to the last. With moisture-wicking fabrics and technical solutions, you are perfectly equipped for changing weather conditions.

ULTRA 50

64066_4492

POMOCA

SWISS MADE

The POMOCA outsole offers impressively outstanding cushioning and superb grip on any surface as well as in any conditions.

With its balanced cushioning and comfortable fit, the Ultra 50 will support you over long distances on alpine terrain. Maximum shoe volume counteracts fatigue and guarantees top comfort even after many kilometers on demanding trails.

ULTRA 15

48265_4492

The Ultra 15 Backpack offers many different pockets on the front and sides. They allow all sorts of possibilities for stashing your Soft Flasks and insulating accessories such as seamless arm sleeves. Meaning you can quickly adapt to changing conditions on long runs.

ULTRA GORE-TEX SHAKEDRY™ JACKET

71000_0917

The ultralight shell jacket not only protects you, but also your pack and its contents from rain, always adapting to your every movement. Because of forgoing an additional fabric layer over the GORE-TEX membrane, water durably beads up directly on the outside. That prevents the jacket from wetting out and you from getting cold.

ULTRA S-TECH SHIRT

71426_8811

The Ultra S-Tech Shirt is made using a nearly seamless construction. Moisture is quickly wicked from the body, thus reliably preventing hotspots and chafing. Integrated mesh zones increase ventilation.

ULTRA 2IN1 SHORTS

71458_8811

The airy outer shorts have numerous pockets all around the hips. Store your bars, gels or accessories in them during and run and keep it all really accessible, too. Perforations ensure extra ventilation, and reflectivity keeps you safe in the dark.

MOUNTAINEERING

The evolution of mountain sports, a category between mountain running and common mountaineering. Mountaineers climb peaks dynamically light and fast. Whether mountains higher than 3,000 meters, numerous peaks on one day, or multi-day crossings, what is demanded in first order is versatility, speed and agility. Constantly changing conditions and diverse alpine terrain offer special challenges to gear. What is needed are lightweight products that are minimal in size but maximal in performance, plus multifunctionality that offers athletes top protection. In short, products that combine low weight, comfort and versatility.

TRANSALPER DYNASTRETCH PANTS **NEW**

The Transalper Dynastretch is a lightweight, technical pant for all kinds of mountain adventures. With its athletic cut that adapts to every movement and its preformed knees, you have all the freedom of movement you need to conquer your path to the summit over alpine terrain. The pant also fits comfortably under a climbing harness with its flat waistband with partial elastic inserts and diagonal harness-friendly pockets. A zip at the pant hem lets you fit the pant to whichever footwear you select.

FEATURES

ATHLETIC FIT

- ✓ Preformed knees
- ✓ Expandable hem
- Stretch hem
- ✓ Partial elastic waist
- ✓ Belt loops
- Fully adjustable elastic waist

WEIGHT

M 278g | W 255g

- ✓ Perforations at back yoke
- Jersey inserts
- ✓ Zip pocket / Zip pockets
- 2 slash pockets
- Reflectivity
- Long lengths available

M 71452 – P.116
W 71453 – P.116

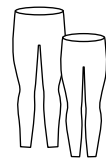

TRANSALPER HYBRID PANTS

The Transalper Light Dynastretch Pant has an impressive minimalist design and offers a versatile range of use. This quick-drying, stretch, wind- and water-resistant fabric is comfortable and high-performance all at the same time. With its athletic cut and preformed knees, you also will look fine on fast mountain ascents. The pant is available in two colors as well as various lengths.

FEATURES

TIGHT FIT

TRAVERSE DYNASTRETCH PANTS **NEW**

A pant with a modern design for fast mountain outings. Its narrow, flattering cut and stretch Dynastretch fabric transform this pant into the perfect blend of running tight and classic outdoor pant. In addition to its breathable Dynastretch fabric, you get extra ventilation from laser perforations when you work up a sweat. Two zip pockets, reflectivity, and a fully adjustable elastic waistband round out this pant.

PICK YOUR PANTS

DYNASTRETCH™

➤ Fast mountain adventures demand stretchy, breathable apparel that is still rugged. For pants and light wind jackets, we turn to our proprietary DYNASTRETCH fabric. The four-way-stretch knit is wind- and water resistant, quick-drying and allows huge freedom of movement.

TRANSALPER SYSTEM

The mountains are our home and our playground. They challenge us with demanding ascents, exposed climbing passages, and unforeseen turns in the weather.

Your apparel and your gear must not only protect but also offer freedom of movement, and be durably long-lasting, and adapt quickly to every situation.

TRANSALPER GTX

64073_8201

The Transalper GTX is the new Mountaineering shoe in the DYNAFIT Collection and your reliable partner in your alpine endeavors. In addition to the waterproof GORE-TEX membrane, the Transalper GTX has a climbing zone at the toes and a quick lacing system. Two additional metal hook eyelets ensure that the shoe hugs your foot even more closely and thus offers more security and traction.

Detailed information about the Transalper GTX can be found on page 22.

POLARTEC®
Delta™

TRANSALPER GRAPHIC SHIRT

71515_8811

Polartec® Delta™ is a cooling material technology in which air circulation is increased via the special knit construction and surface texture. It ensures moisture transport and lessens the unpleasant feel of wet fabric next to skin.

TRANSALPER 18+4 : NEW MULTITALENTED PACK

48272_5164

Depending on the needs of your activity, this pack's volume can be expanded simply using a zipper, going from 18 liters to add an extra 4 liters. Two stretch side pockets offer room for a bottle and collapsed poles. A new shoulder strap construction has an ergonomic design with extra pockets for smartphone and flasks.

TRANSALPER DST JACKET

71447_6552

Thanks to breathable fabrics with mesh inserts at the back, you can master intense, steep sections with panache.

TRANSALPER LIGHT DST PANTS

71321_8201

This quick-drying, stretch, wind- and water-resistant Dynastretch fabric is comfortable and high-performance all at the same time.

BIKE

MINIMAL PACKING SIZE, MAXIMUM VERSATILITY

The combination of various mountain sports is now a new type of alpinism. The lines between the individual types of modern mountain endurance sports are increasingly fuzzy. Various disciplines such as Trail Running, mountaineering, mountain biking and ski mountaineering are becoming more adaptable and, depending on desire and mood, can be linked into one much larger mountain adventure. In harmony with the outdoors, athletes gladly abandon using a car – which can increase the route’s distance by a few kilometers. With mountain bikes, training often starts right from your front door, heading out over meadows, across fields and through woods at a dynamic pace uphill, before the final meters to the summit on rocky terrain demand technical expertise. For these modern, athletic mountain athletes, DYNAFIT has developed a technical, intelligently engineered Bike collection that is as multi-faceted as athletes themselves: lightweight with a small packing size, versatile in use, and at the same time very comfortable for all different types of movement.

ESSENTIALS

Get the most out of your downdays! Spending active time in the mountains is our passion and source of energy. But sometimes our bodies need a break, conditions restrict us to go out or we just want to have a good day in the city. But being away from the mountains doesn't mean we can't live an active lifestyle. The 24/7 collection offers various stylish and functional products for each time of the day in an urban environment and reflects our passion for sports and outdoors.

Urban. Tech. Light.

THE DYNAFIT SUMMER TRILOGY

DYNAFIT X FRANCESCO PAVIGNANO

As part of the DYNAFIT Artist Series, unique T-shirts with inspiring print designs were created in partnership with Italian artist Francesco Pavignano. The three designs of Running, Hiking and Riding embody the limitless diversity of possibilities that the mountains offer us in the summer. Born at the foot of the mountains, Francesco was shaped by them and they influenced his art. The Artist Series Collection reflects his view of the mountains.

The t-shirts of the Artist Series are made of 100% cotton.

48821 ULTRA POLE

Weight: 260 g
Size: Uni
Adjustable Size: 115 - 135 cm
Packing Length: 42 cm

Foldable ultra running aluminum pole which is height adjustable.

TECHNOLOGIES

- EVA Grip Extension

MATERIALS

Grip: EVA Foam
Main: Aluminium
Tip: Racing Basket

8730 malta/cactus

08-0000048821

48816 VERT PRO POLE

Weight: 152 g
Size: 110 - 135 cm
Packing Length: 39 cm

Foldable and lightweight vertical running carbon pole for ambitious athletes.

TECHNOLOGIES

- EVA Grip Extension

MATERIALS

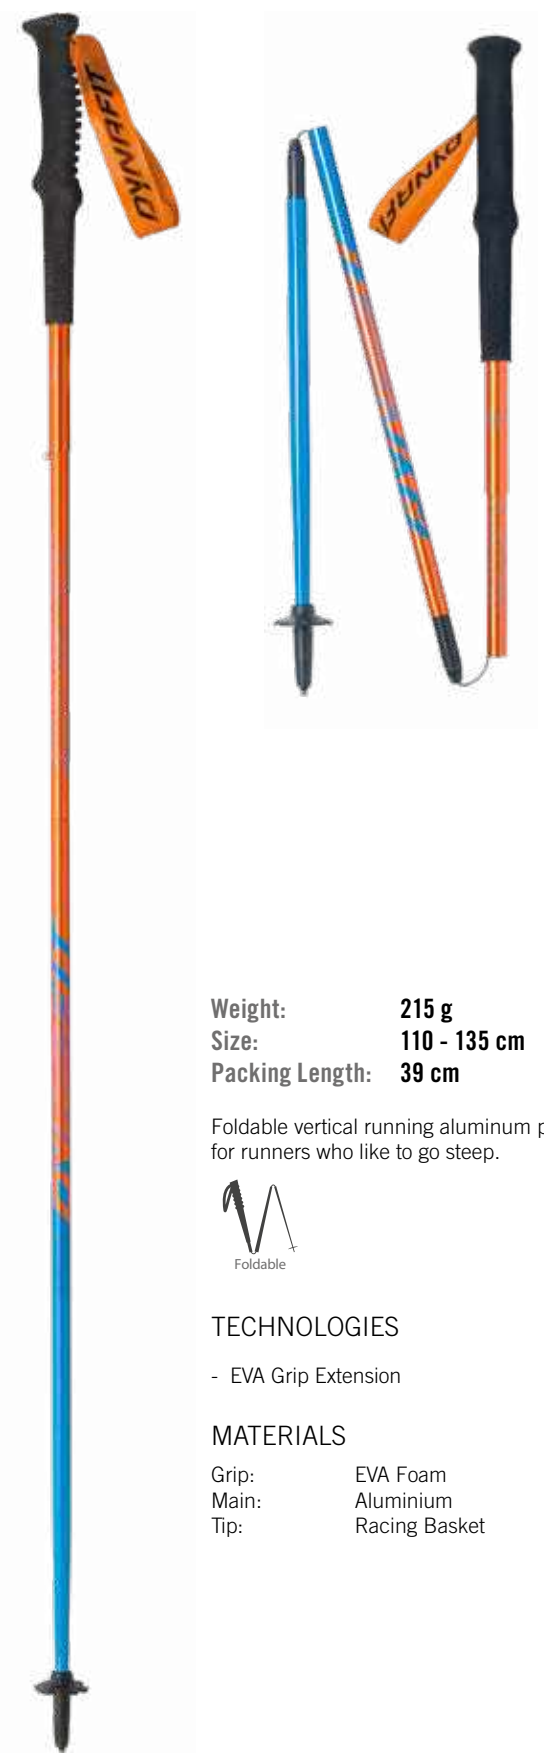

Grip: EVA Foam
Main: Carbon Fibre
Tip: Racing Basket

5251 black/cactus

08-0000048816

48820 VERT POLE

Weight: 215 g
Size: 110 - 135 cm
Packing Length: 39 cm

Foldable vertical running aluminum pole for runners who like to go steep.

TECHNOLOGIES

- EVA Grip Extension

MATERIALS

Grip: EVA Foam
Main: Aluminium
Tip: Racing Basket

4572 general lee/
methyl blue

08-0000048820

48848 ELEVATION PRO POLE

Weight: 122 g
Size: 115 - 135 cm

Lightweight fixed-length pole made of carbon fibre in the upper and Kevlar carbon in the lower area for maximum stability.

TECHNOLOGIES

- 2in1 Materials
- EVA Grip Extension

MATERIALS

Grip: EVA Foam
Main: Carbon Fibre
Tip: Racing Basket

* Weight specifications for each product refer to women size M and men size L.

TIGHT FIT

- Made of stretch/elastic fabrics
 - Fit next to the skin
- These close fitting garments optimize the moisture management and thermal efficiency.

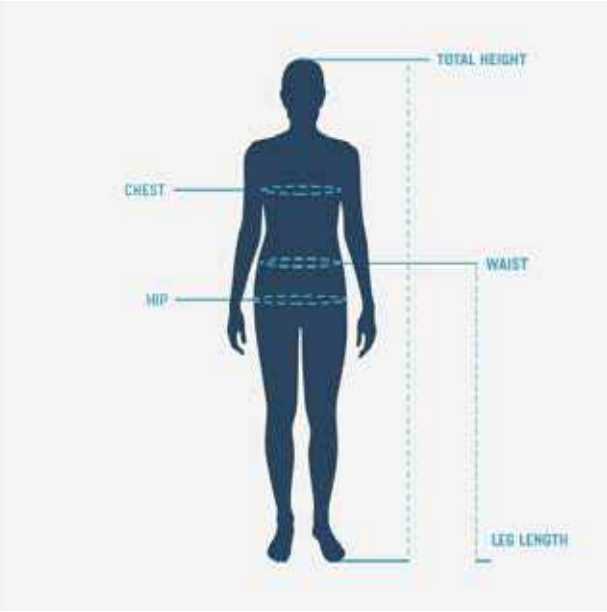

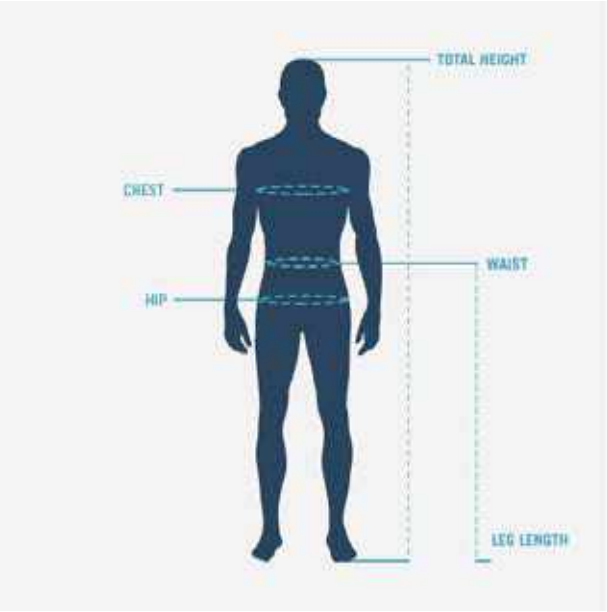

ATHLETIC FIT

- Anatomic shape
 - Freedom of movement
 - Lower volume for reduced bulk
- These closer-fitting pieces layer well under other garments.

SPORTIVE FIT

- Anatomic shape
 - Maximum range of motion
- Easy layering under these relaxed fitting items extends seasonal versatility and comfort.

GLOVES

* Weight specifitcations refer to size L.

CORPORATE SOCIAL RESPONSIBILITY

We see it as our duty to equip passionate mountain sport athletes with innovative, premium products for unforgettable experiences in the outdoors. In doing so, it is a given for us to also assume responsibility – certainly for the safety of the athletes, but also for protecting our environment and fellow human beings.

Corporate responsibility comprises not only sustainable business practices along the entire value chain but also equally transparent communication with all relevant stakeholders in order to continually learn and improve.

ENSURING OUR MATERIALS AND PRODUCTS ARE SAFE FOR BOTH HUMANS AND ANIMALS, AND FOR THE ENVIRONMENT IS OUR TOP PRIORITY.

FAIR WORKING CONDITIONS

The largest portion of our apparel is produced in Asia. The global centre of competence plus cutting and sewing expertise is located there, including some of the most efficient production partners. This means some of our factories are far away from us, making it harder for us to monitor each step of the process. Achieving fair working conditions in these factories means we have to pick the best partners and work with them to help them reach our high standards for working conditions.

All our suppliers have to sign and commit to our **CODE OF CONDUCT**, a document that sets the social and ethical standards to be respected in all facilities manufacturing our products.

FAIR WEAR FOUNDATION

To ensure we are always putting the well-being of our associates first, we also partner with the most rigorous labour conditions expert in textiles that we know: Fair Wear Foundation. Fair Wear Foundation is an independent non-profit organisation with the mission to improve working conditions globally in the textile and apparel industries. We have been working with Fair Wear Foundation since 2013 to ensure the well-being of workers involved in the manufacturing of our textile products. FWF helps us monitor working conditions and audit our factories, it supports us in our relations with our suppliers, and it

ensures we are subject to an annual review. In 2017, the FWF first assigned us the leader status – a level only given to brands who are doing exceptionally well and operating at an advanced level. FWF raises the bar with its requirements every year, and we're continually being challenged to do more to satisfy these increased standards.

We're proud to say that in 2020 we've received the leader status for the fourth time in a row.

CURRENTLY, 96% OF OUR TEXTILE PRODUCTION IS UNDER MONITORING FOR FAIR WORKING CONDITIONS

(the factories have either been audited by third party experts in workers' rights or are located in low-risk countries such as Italy and Germany).

Find out more about Fair Wear Foundation at [fairwear.org](https://www.fairwear.org).

HIGHER CHEMICAL STANDARDS

One of our priorities is making top performance products that are safe for both humans and the environment. Our goal is to control the entire lifecycle of our products – from raw material, through the production process, to the finished product. Our products are manufactured according to the

OBERALP CHEMICAL POLICY. The document establishes a formal process to ban or limit the presence and use of hazardous substances in our products and production processes. It is even stricter than the legal limits and thus guarantees safety and compliance. Our chemical policy is a central part of the Conditions of Purchase with our suppliers, and it's mandatory at every stage of the production and distribution process.

PROUD TO BE A bluesign® PARTNER

We also work with expert partners and third-party certifications, such as bluesign®. We have been bluesign® system partners since 2011 and today a large portion of the fabrics used in our products are certified. bluesign® seeks to eliminate hazardous substances starting at the first stage of the manufacturing process and guarantees a safe and clean supply chain for the environment and for everyone involved at every step. Additionally, we work with an external and independent chemical laboratory to conduct tests on our products every season to ensure they are meeting our strict internal standards.

PFC-FREE DURABLE WATER REPELLENTS (DWR)

Perfluorocarbons (PFCs) are a type of chemical used to make products resistant to water, grease and stains. PFCs guarantee best-in-class performance for our technical apparel that needs to be both water-repellent and still allow humidity to exit. The problem with PFCs is that they are linked to negative health effects in humans, animals and nature. Both during the production and use phases, PFCs are released into the environment and are persistent. This means they degrade very slowly in nature and can also travel easily through water and wind. They then end up in our food chain. For this reason, since 2014 we have completely eliminated long-chain PFCs (C8) from all our products. All our water-repellent (DWR) products now either contain shorter-chain PFCs (C6) or are 100% PFC-free. We're continuously working to increase the number of PFC-free DWR treatments in our products.

For our most technical products to be used in extreme weather conditions, it is necessary to apply C6 DWR treatment to ensure full weather protection and warmth. We are continuously investing to further reduce the use of C6-chemicals in our fabrics and significantly increase the number of PFC-free products without compromising on user-safety performance. Please note that contamination from PFCs cannot be excluded.

CORPORATE SOCIAL RESPON- SIBILITY

HANDMADE
IN EUROPE

MADE IN EUROPE

55% OF ALL DYNAFIT PRODUCTS ARE MANUFACTURED IN THE ALPS.

As an innovator and developer of technical equipment and gear for mountain sports, it remains our biggest challenge to work sustainably. Social responsibility for people and nature is a given.

Fair working conditions, high quality standards, shorter transport distances – all of this saves resources and is our highest priority in our search for appropriate production facilities in Europe.

We are working constantly on shifting more production facilities to Europe. When it comes to bindings and ski touring boots, 100% of production occurs in in Germany respectively in Italy; textiles are still in large part imported from Asia. However, we pay special attention here to ensure safe and fair working conditions in all our factories.

For more information on our sustainability work, read our latest sustainability report at dynafit.com/sustainability.

PRODUCTION SITE	VALUE % (FOB)
Germany	22,5%
Italy	21,9%
Vietnam	20,0%
Bangladesh	11,3%
China	10,5%
Austria	5,6%
Lithuania	2,0%
Switzerland	1,7%
Tunisia	1,7%
Taiwan	1,1%
France	0,8%
Belarus	0,8%

MADE WITH RECYCLED CONTENT

The styles marked with “made with recycled content” contain at least 50% recycled content in their main fabrics. The recycled polyester used in our collection is mostly made from post-consumer PET bottles. Existing plastic is melted down and spun into new polyester fiber, also known as rPET. This means we reduce our dependence on petroleum and we use “waste” as the raw material.

By using post-consumer recycled plastic to create our recycled fibers, we are also diverting plastic from ending up in landfills. Studies show that the production of recycled polyester saves more than 50% of CO₂ emissions and energy compred to virgin polyester, reducing the overall environmental impact of the product. Most of the shirts made of polyester are also recyclable, meaning their fabric can be fed back into the production cycle.

Recycled Content Highlight page 70

MATERIAL GLOSSARY

BREATHABILITY

Breathable material is permeable to water vapor, thus able to transfer moisture from the inside out. The breathability of materials can be measured with RET and MTRV values.

RET (RESISTANCE–EVAPORATION–TRANSMISSION)

The RET value indicates the water vapor resistance of a fabric. The lower the resistance, the more breathable the material (e.g. RET <3 = highly breathable and RET> 20 = non-breathable).

MVTR (MOISTURE–VAPOUR–TRANSMISSION RATE)

The MVTR is one way to express the breathability of fabrics. Laboratory tests measure the amount of water vapor that can pass through 1 m² of material in 24 hours. The higher the amount, the more breathable the material is. An MVTR of >10,000 is considered a good level of breathability.

WATER COLUMN

The water column is an indicator of the water permeability of a fabric or membrane. The height of the water column indicates the constant pressure of water at which the fabric starts leaking water. The higher the number, the better is the waterproofness. Most manufacturers consider fabrics as waterproof when the water column is higher than 10,000 mm.

ABRASION/SNAGGING RESISTANCE

Established by the Martindale test: The fabric is rubbed against wool in a circular motion; the level of resistance is determined by the number of times the operation can be repeated before the fabric tears.

PILLING RESISTANCE

Indicated with values from 1 (severe pilling) to 2–4 (moderate pilling) to 5 (very slight pilling). Tested with the Martindale method – the fabric sample is rubbed against itself and compared with standard results after 2,000 cycles.

DWR (DURABLE WATER REPELLENT)

These products are treated with an ultra-thin, durable water-resistant treatment. In doing so, a polymer is applied to the fabric's exterior so water simply beads up. The coating wears off with time through normal wear and tear, dirt, washing, insect repellents or other things and can be easily revived.

MATERIAL SHORTCUTS

PA	Polyamid
PP	Polypropylen
CO	Cotton
EL/EA	Elasthan
PE	Polyehtylen
PES/PE	Polyester
PTFE	Polytetrafluorethylen

SHELLS

GORE-TEX® SHELLS

GORE-TEX garments lead the way in waterproof protection, breathability and durability for technical outdoor apparel.

BENEFITS:

- Durably waterproof
- Very breathable
- Totally windproof

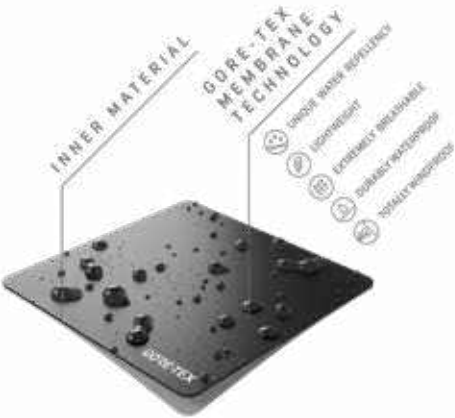

GORE-TEX SHAKEDRY™ GARMENTS

Through this technology the face fabric could be eliminated and a unique beading surface is created. This means no wetted out face fabric and constant water repellency and thus no additional weight pick-up. As the name says the garments shake dry.

Water Column: 23.000 mm
Breathability: RET < 3
Weight: 49 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Unique water repellency
- Extremely breathable
- Lightweight

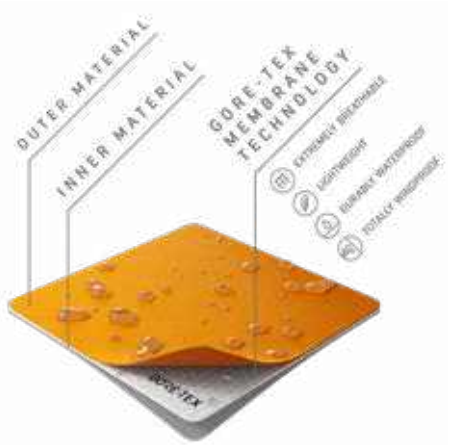

GORE-TEX ACTIVE GARMENTS

Garments made with the newest generation of GORE-TEX active 3-layer product technology are lightweight, quiet and extremely breathable, being specially developed for high energy activities in all weather conditions. They deliver the waterproof and windproof performance of a hard shell with the pleasant touch and next to skin comfort of a soft shell.

Water Column: 23.000 mm
Breathability: RET <4
Weight: 78 g/m² & 70 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Extremely breathable
- Lightweight

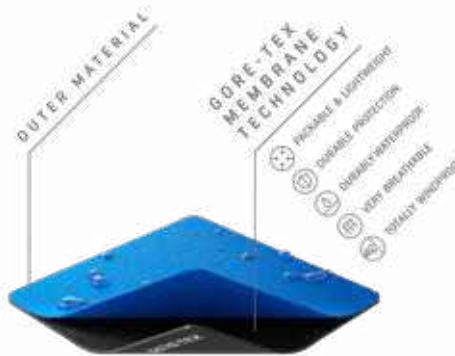

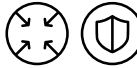

GORE-TEX PACLITE® PLUS GARMENTS

Hope for the best, prepare for the worst. Being serious about your mountaineering adventure means carrying a back-up shell that's exceptionally packable und lightweight, very breathable, and protects you with the GUARANTEED TO KEEP YOU DRY™ promise. Proven to be abrasion resistant and very durable, with GORE-TEX PACLITE® PLUS garments you are ready for unexpected adventures.

Water Column: 28.000 mm
Breathability: RET < 9
Weight: 74 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Packable & lightweight
- Durable protection

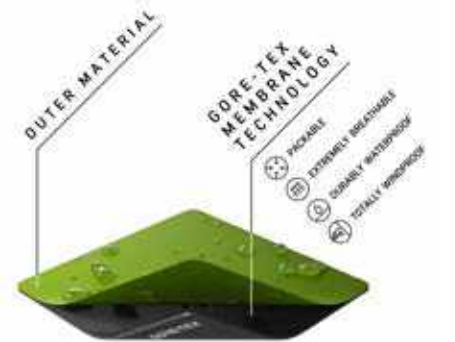

GORE-TEX PACLITE® GARMENTS

Packable comfort and protection. A lightweight back-up to make more of every day. The strikingly minimalist 2L construction of GORE-TEX PACLITE® garments allows them to be so lightweight and packable. A durable protective layer made of an oleophobic (anti-oil) substance and carbon makes a separate lining unnecessary.

Water Column: 28.000 mm
Breathability: RET < 6
Weight: 92 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Packable & lightweight

DYNA-SHELL

DYNA-SHELL 3 LAYER **DYNA-SHELL 2.5 LAYER**

DYNA-SHELL

DYNA-SHELL fabrics are DYNAFIT's own performance fabrics for weather protection. The DYNA-SHELL 3L and 2,5L fabrics are a waterproof, windproof and breathable hard-shell materials. The fabrics are very lightweight and breathable, allowing for optimum performance during endurance sports.

Water Column: 20.000 mm
Breathability: MVTR=20.000 g/m²/day

INSULATION & THERMALS

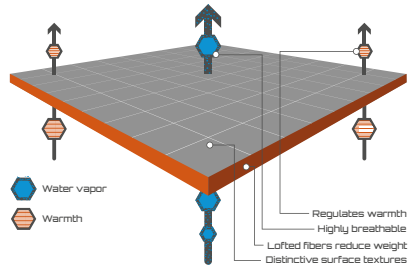

POLARTEC® ALPHA®

ACTIVE INSULATION

Polartec® Alpha® is an active insulation that enables moisture transport through the fabric to prevent overheating. At the same time, it keeps you warm and guarantees comfort. The main features of this technology are: it is breathable in all activities, dries quickly to minimize heat loss, insulates even when wet, it is machine washable and offers warmth at a low weight.

Composition: 100% PES
Weight: 50 g/m²

POLARTEC® POWER GRID™

TECHNICAL FLEECE

Polartec® Power Grid™ fabrics are designed to keep your skin dry when you sweat. They feature a bi-component knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly. These fabrics weigh less, take up less pack space, and deliver more insulation and breathability than most fabrics in their class.

Composition: 89% PES, 11% EA and 92% PES, 8% EA
Weight: 183 g/m2 and 193 g/m2

POLARTEC® THERMAL PRO®

ADVANCED FLEECE

Polartec® Thermal Pro® fleeces use technical fiber compositions that maintain a soft texture and air pockets for thermoregulation and breathability. Knit with premium polyester yarns, Thermal Pro® is cozy, resilient, and stylish.

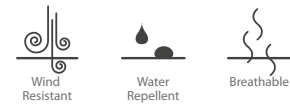

Composition: 80% PES, 12% LY, 8% EA
Weight: 207g/m2

TECHNICAL FABRICS & FABRIC TREATMENTS

DYNA-SHELL ULTRALIGHT

Dyna-Shell Ultralight fabrics are ultra lightweight micro-denier woven nylon fabrics. Thanks to the tight weaving structure, the abrasion resistant fabric becomes almost completely windproof. Still, the fabrics have a soft touch and are breathable. They are especially used for ultra lightweight windbreakers or as the outer material of insulation jackets.

DYNASTRETCH

Thanks to their closely woven structure, the Dynastretch fabrics are very wind-resistant, yet remain stretchy. In addition, a durable water repellent (DWR) treatment has been applied to create a surface that repels water. Due to their abrasion resistance and breathability, Dynastretch fabrics of different weights are used for a wide range of applications: from ski touring pants, to hiking pants and shorts to wind breaker jackets.

S-TECH

S-Tech is a knit technology that enables our apparel engineers to develop seamless styles that include various textures and fibers – without the need to add seams, cutting or weight. Thanks to the seamless S-Tech construction, the elastic material adapts perfectly to the body. This provides increased freedom of movement, improved moisture management and an increased level of comfort.

Dryarn® is an innovative microfiber, which is more breathable than polyester, more insulating than wool and lighter than any other fiber.

LIGHTNESS:

Dryarn® is super light – meaning that the fiber weights 32% less than wool and 34% less than Polyester.

THERMAL COMFORT:

Dryarn® offers excellent moisture transport to support a healthy microclimate on the skin. Sweat is immediately transported to the

outside, so your body stays dry and warm in every conditions.

DRY SKIN:

Dryarn® is extremely breathable, evaporating sweat to the outside and preventing that the fabric gets soaked. Thus the body stays warm during normal and exhausting activities.

BACTERIOSTATIC:

Dryarn® is a naturally bacteriostatic fiber, it reduces the risk of irritation, allergies and rashes, as well as reducing odors.

POLARTEC® DELTA™

COOLING FABRIC

Polartec® Delta™ is a cooling fabric technology that increases airflow and ensures faster moisture dispersal and reduced wet-cling. Delta's specialized knit construction uses both hydrophobic and hydrophilic yarns for more advanced control of moisture dispersal. The patent-pending knit structures keep you cooler in hot conditions.

ELASTIC INTERFACE®

Elastic interface® is an Italy based specialist for performance cycling pads. Their lightweight cycling pads are engineered to maximize freedom of movement, saddle stability and protection, to avoid any discomfort, inconvenience and pain. Their MTB Performance 3 cycling pad used in our products was specifically designed to meet the requirements of long distance mountain biking. 100% of their production is located in Italy.

Polygiene
STAY FRESH

POLYGIENE®

Polygiene is a permanent odor control garment treatment. It prevents the growth of odor-causing bacteria and fungi at the source. A low concentration of silver salt which has antimicrobial properties is integrated in the fabric. It is not nanosilver and is only active on the textiles itself. The treatment is bluesign® approved which means it meets rigorous independent environmental and product life cycle standards.

DRIRELEASE®

A patented performance sports material that has the look and feel of classic cotton, but keeps you dry, cool, comfortable and fresh. dr release fabrics offer a patented blend of 85-90% synthetic, hydrophobic (water repelling) fibers and 10-15% natural, hydrophilic (water absorbing) fibers. The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly. That's why clothing made with DR always feels soft and stays dry.

BACKPACK MATERIALS

ELASTIC AIRMESH

Stretch, breathable mesh.

NYLON 210D RIPSTOP

Nylon fabric with thicker threads (210D) woven into the warp and weft at regular intervals to further increase the material's tear resistance.

HONEYCOMB

Extremely lightweight nylon outer material.

NYLON 40D RIPSTOP

Nylon fabric with thicker threads (40D) woven into the warp and weft at regular intervals to further increase the material's tear resistance.

POLE MATERIALS

CARBON

Carbon is four times more resilient than aluminum and offers maximum stability. It is corrosion free, has a low moment of inertia, a low vibration and a high rigidity. It also offers a distinctive carbon aesthetic, balanced by its structure and texture.

EVA FOAM

Flexible foam for an ergonomic fit.

ALUMINIUM

Aluminium is most cost-effective and compared to carbon less expensive. It also offers a high rigidity and it has reflective characteristics.

EVA GRIP EXTENSION

Grip extension with EVA foam grip. Enables individualized and flexible use on various surfaces.

2IN1 MATERIALS

Light and stiff carbon at the upper end and impact-resistant Kevlar carbon at the lower end of the stick.

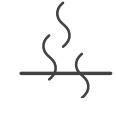

APPAREL

ACTIVE AIRFLOW VENTILATION

Laser-perforated openings under the arm or on the back increase ventilation.

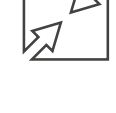

BREATHABLE

Breathable performance fabric.

EXPANDABLE BACK

When opened, the zipper on the back allows carrying a pack under the jacket.

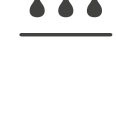

PACKABLE

Product packs small.

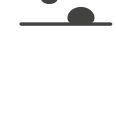

QUICK DRY

Extra quick-drying performance fabric.

WATERPROOF

Performance fabric with a waterproof membrane and sealed seams.

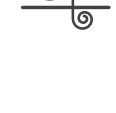

WATER-REPELLENT

Performance fabric with water repellency.

WINDPROOF

Performance fabric with a windproof membrane.

WIND-RESISTANT

A tightly woven fabric keeps out most wind and at the same time enables good ventilation.

4-WAY-STRETCH

Performance fabric with 4-way stretch for great freedom of movement.

EQUIPMENT

COMPRESSION STRAP

Pulling on a strap to tighten it compresses the pack to a minimum volume, depending on contents.

HELMET ATTACHMENT

Helmet holder with light stretch, on the underside of the pack for simple retrieval and stowing.

POLE FIXATION

Performance fabric with a waterproof membrane and sealed seams.

ROLL TOP

A practical roll-top closure adapts to various quantities and always remains securely shut.

SAFETY BOX

An easily accessible pocket with hook-and-loop closures on the bottom of the pack allows access to pack contents without needing to take it off.

SPEED POLE FIXATION

Pole attachments on the side of a pack. Poles tips are placed in a special pocket and lashed onto the pack using an elastic cord.

VOLUME EXPANSION

Volume expansion by an extra 4 liters with a wrap zipper system

WIND SHIELD

An integrated wind shield in the upper left pocket on the shoulder strap can be used if needed to protect the upper body from wind.

ADJUSTABLE POLE LENGTH

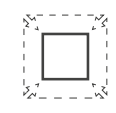

Poles are variable in length and can be adjusted from 115 to 135 cm, depending on the use and user height.

FOLDABLE

The pole can be collapsed into three parts with the push of a button and folded together. This allows the pole to be packed down and stowed at a length of only 42 cm or 39 cm depending on the model.

FOOTWEAR

ADAPTIVE TONGUE/FIT SYSTEM

3-layer construction made with parachute material - wraps foot and adapts fit while running - added on top of the seamless tongue.

ALPINE ROCKER

The rocker midsole has a rocker shape that results in fluid and dynamic heel-to-toe running motion.

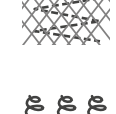

CLIMBING ZONE

The Climbing Zone is a smooth area without lugs or tread on the outsole at the toes. This enlarges the contact area and increases frictional forces when climbing or scrambling on rocks.

DNA VOLUME REDUCER

DNA feature: spare insole that reduces the volume of the shoe - for a slimmer and tighter race fit.

DOUBLE SPEED LACING

Double Speed Lacing refers to a DYNAFIT proprietary lacing system that threads two laces in one special cordlock at the same time.

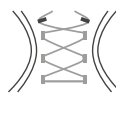

INVISIBLE LACING

Stretch fabric lace cover to protect laces from wear-and-tear and to keep out debris such as leaves and stones.

MAXIMUM CUSHIONING

Maximum cushioning for maximum running comfort.

ENERGY RETURN

Newly developed midsole technology that combines various materials with different characteristics to create a super responsive, dynamic and reactive Trail Running shoe.

POMOCA GLIDING PATH

A special S-shaped tread pattern – the “gliding path” – facilitates a natural roll-through of the foot, ensures a seamless push-off, and reduces elastic deformation for better shape retention. A traction zone alongside the gliding path offers good footing on varying terrain.

PRECISION FIT SYSTEM

Lacing system with metal eyelet hooks and lacing that runs deeper into the toe box than usual. This hugs the foot more snugly for increased support and safety.

SEAMLESS TONGUE

Seamless tongue construction to eliminate chafing and reduce weight.

TOE BUMPER

Reduces the effect of impacts at the toes and forefoot, while at the same time improving the durability of the shoe.

VIBRAM LUGS

Special design of Vibram Lugs - lugs adapt individually to the ground for better traction.

CSR

MADE IN EUROPE

Produced in Europe.

MADE WITH RECYCLED CONTENT

Styles containing at least 50% recycled content in their main fabric.

ORGANIC COTTON

Cotton from certified organic farms that do not use pesticides or synthetic fertilizers.

PFC-FREE

PFC free durable water repellent finishing.

UPCYCLED PRODUCT

Products made from discarded materials.

B2B PORTAL

DYNAFIT AT YOUR FINGERTIPS

Our B2B portal is an online shop for business customers. In comparison to email or faxed orders, the platform offers an overview of real-time availability because the system is connected to our inventory management system and is updated daily. Every retailer who has been given access by us can place orders around the clock and can download marketing materials such as images, videos, workbooks, and much more. Website: serviceportal.oberalp.biz

WHY YOU SHOULD USE OUR B2B PORTAL

- Ability to order any time of the day or night, regardless of our office hours
- Deliveries FOB without any minimums
- Simple overview of available sizes and colours
- Easy, timely, and quick processing – without the need to hold on a call
- Opportunity to print or electronically archive all orders
- Downloading of images, product descriptions, price lists, catalogues (PDF format), and videos
- Ability to track shipments of orders placed
- Overview of all orders, whether placed on the B2B portal or elsewhere

HOW TO REGISTER FOR THE B2B PORTAL

1 Open a web browser to our home page dynafit.com. In the footer area, on the right side, select “B2B / PRESS PORTAL”, or input the web address serviceportal.oberalp.biz into your browser.

2 Fill out the new customer registration form with all the necessary information. Within 24 hours, you will receive your login details for access.

3

At serviceportal.oberalp.biz, a dialogue box will appear to request your login details. Input your user name and password. Click on “Log in”.

4

In the B2B portal, we offer all products of the OBERALP Group available for each country. First, choose the collection from which you want to order by clicking on the brand. You can select any collection for which you have access.

5

You are able to search for products by clicking on “Order” in the “Products/Orders” section and then inputting the product name (a part of the name is usually sufficient) or the product number. Click on “Search” to show all relevant search results.

6

Click on an article and then you will see in the next overview whether the article is available in the different colors. When the box is bordered in green, the product has immediate availability and there are usually at least 10 pieces in stock. If the quantity in stock is less than 10, the box is bordered in orange. If the product is not available immediately but will be available for shipping in the next four weeks or less, a small “i” is visible in each box with the estimated week of delivery. If a specific size is not shown, it is no longer available. Simply input your desired quantity in the box, and then click on “Add to my cart”.

7

Repeat steps 5 and 6 for each article you would like to order. Your orders will be placed in your cart. To finalise your order, click on your card and select “Place my order”. After inputting a delivery address, if it is different, click on “Confirm order” to complete the transaction. You will receive an order summary by email.

8

You can also download product images, action shots, workbooks, logos, videos, and our Service Guide. For any of those, just click on the left menu area on “Resources” and open the desired menu item. There, you can download a wide variety of materials.

9

Afterward, you can look at your order again, print it out, or download the associated product images for your order. Click here on “Service” and “Order”. Here, you see all of your orders. Clicking on “Download” allows you to download your order sheet or the associated product images.
