

DYNAFIT

SUMMER 2021

**TRAIL RUNNING
ATHLETIC MOUNTAINEERING**

CONTENT

All paper of this DYNAFIT Workbook comes from 100 % reclaimed or re-used material.
FSC® helps take care of forests and the people and wildlife that call them home.

For the printing of this workbook only mineral oil-free ecological printing inks were used, which are 100 % degradable.

We offset CO₂ emissions of our workbooks with certified climate-protection projects. To that end, all CO₂ emission sources are measured. That includes paper pulp, paper production, as well as printing plates and ink that are used for printing. CO₂ emissions that are created in printing are offset by certified climate-protection projects in other areas. Every order entered has an individual tracking number that is integrated into the upper logo. With this ID, the climate neutrality of the printed product from the point of ordering to the offset with CO₂ can be traced.

GRIP **P** – POMOCA

GRIP

VIBRAM® MEGAGRIP

The new high-performance rubber compound featuring unparalleled grip on wet and dry surfaces, rugged longevity and optimal ground adaptability.

**POMOCA –
70 YEARS OF SOLE MAKING HISTORY**

The newly developed rubber compound and outsole construction provide optimum traction for a smooth, energy-efficient gait. Its biomechanical design promotes a natural motion of the foot and prevents dirt and rocks from lodging in the tread and sticking to lugs.

FIT

DNA (SUPER MINIMAL VOLUME)

Full control and sensitivity. Tight and precise like a glove to perform at a high level. Very low shoe volume.

MINIMAL VOLUME

Precise fit which allows a proper control and support. Low shoe volume.

MEDIUM VOLUME

Wrapping effect but without any constraints in order to keep a high versatility of usage. Medium shoe volume.

MAXIMUM VOLUME

Stability and comfort. More space for a proper blood circulation on longer distances. Maximum shoe volume.

FEATURES OF ALL DYNAFIT SHOES

BALLISTIC BUMPER

This reduces the effect of impacts at the toes and forefoot while at the same time improving the durability of the shoe.

HEEL PRELOADER

The heel preloader construction ensures comfort and precision support. Diagonal reinforcements at the heel support the foot during the running gait and improve fit in the heel area.

TRAIL RUNNING

Bergläufe, Läufe in alpinem Gelände, Läufe auf Trails – das ist Trail Running. Egal ob steile vertical Kilometer, ultralange Distanzen oder einfach nur vielseitige Trails über Wurzeln, Matsch, Geröll. Trail Running Athleten haben eines gemeinsam: sie bewegen sich schnell und leicht am Berg. Die Anforderungen an das Material sind klar: Intelligente Leichtigkeit, athletische Passformen, ausdauernde Robustheit, zuverlässige Performance und Schutz des Athleten. Einfach gesagt: Trail Running Athleten verlangen Produkte mit herausragendem Gewichts-/Leistungsverhältnis für jegliches alpines Terrain.

ATHLETIC MOUNTAINEERING

Die Evolution des Bergsports, eine Kategorie zwischen Berglauf und Bergsteigen. Athletic Mountaineers erklimmen Berggipfel dynamisch, schnell und leicht. Egal ob Berge über 3.000 Metern, mehrere Gipfel an einem Tag oder mehrtägige Gebirgsüberquerungen – Flexibilität, Schnelligkeit und Agilität stehen an erster Stelle. Konstant wechselnde Bedingungen und unterschiedliches alpines Terrain stellen auch besondere Ansprüche an das Material. Gefragt sind leichte Produkte mit minimalem Packmaß, maximaler Performance und vielseitiger Verwendbarkeit, welche den Athleten maximalen Schutz bieten. Kurz gesagt: Produkte, die Leichtigkeit, Komfort und Vielseitigkeit vereinen.

BIKE

Die Kombination aus verschiedenen Bergsportarten hat sich als neue Spielart des Alpinismus etabliert. Bei modernen Bergausdauersportlern verschwimmen die Grenzen zwischen den einzelnen Kategorien zunehmend. Die verschiedenen Disziplinen wie Trail Running, Bergsteigen, Mountainbiken oder Skibergsteigen werden flexibel und je nach Lust und Laune zu einem großen Bergabenteuer verbunden. Im Einklang mit der Natur wird dabei auch gerne auf das eigene Auto verzichtet – und die Route damit nochmals um einige Kilometer verlängert. Mit dem Mountainbike startet das Training oft direkt vor der Haustür, über Almen, Wiesen und Wälder geht es im dynamischen

Laufschritt bergauf, bevor die letzten Meter zum Gipfel im steinigen Terrain auch technisches Know-how erfordern. Für diesen modernen, athletischen Bergsportler hat DYNAFIT eine technisch durchdachte Bike Kollektion entwickelt, die so vielseitig ist wie der Athlet selbst: Leicht und mit minimalem Packmaß, flexibel einsetzbar und gleichzeitig sehr komfortabel bei den verschiedensten Bewegungsprofilen. Bike + X – das ist Athletic Mountaineering der neuen Generation.

ESSENTIALS

Sportlich, schick und funktional. Aktive Zeit in den Bergen zu verbringen ist unsere Leidenschaft und Energiequelle zugleich. Aber manchmal benötigt der Körper eine Pause. Das bedeutet jedoch nicht, dass wir nicht auch abseits der Berge einen aktiven Lifestyle leben können. Mit den funktionalen DYNAFIT Essentials sind wir auch in der Stadt modisch und sportlich unterwegs. Die Styles bestechen durch gedeckte Farben, klare Designs mit dynamisch, schlanken Schnitten und originellen Details. Neben der Optik überzeugen auch die inneren Werte: moderne Materialien wie drirelease®, GORE-TEX® und PrimaLoft® kommen zum Einsatz. Modisch gedacht und technisch inspiriert – mit unseren Essentials kommt Bewegung in den Stadttag.

TIGHT FIT

- Made of stretch/elastic fabrics
- Fit next to the skin

These close fitting garments optimize the moisture management and thermal efficiency.

ATHLETIC FIT

- Anatomic shape
- Freedom of movement
- Lower volume for reduced bulk

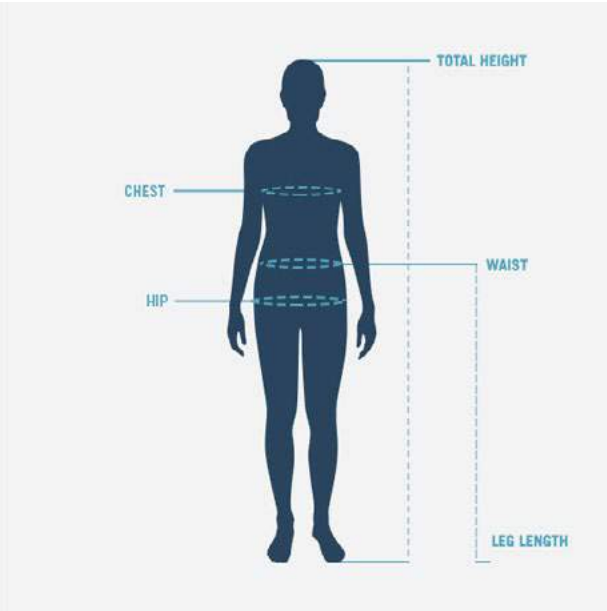

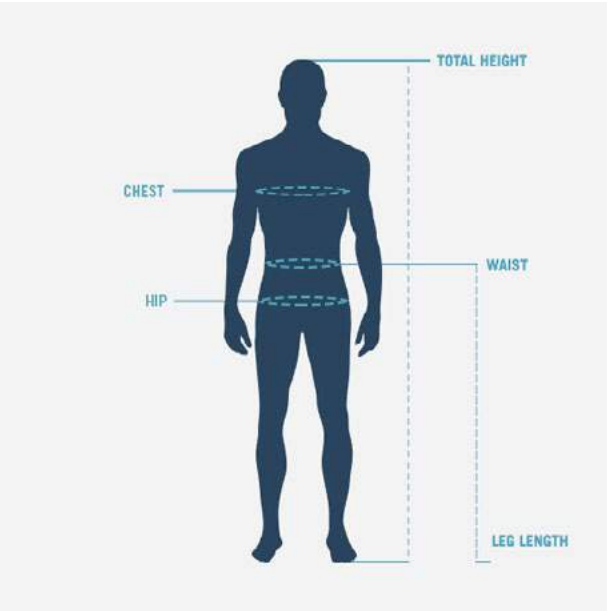

These closer-fitting pieces layer well under other garments.

SPORTIVE FIT

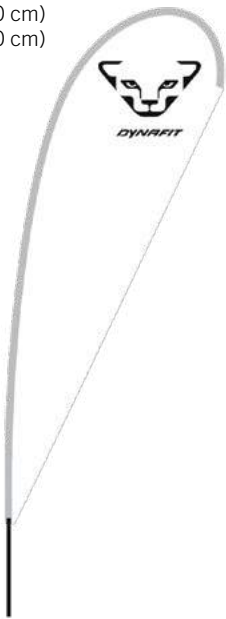

- Anatomic shape
- Maximum range of motion

Easy layering under these relaxed fitting items extends seasonal versatility and comfort.

CORPORATE
SOCIAL
RESPONSIBILITY

We see it as our duty to equip passionate mountain sport athletes with innovative, premium products for unforgettable experiences in the outdoors. In doing so, it is a given for us to also assume responsibility – certainly for the safety of the athletes, but also for protecting our environment and fellow human beings.

Corporate responsibility comprises not only sustainable business practices along the entire value chain but also equally transparent communication with all relevant stakeholders in order to continually learn and improve.

ENSURING OUR MATERIALS
AND PRODUCTS ARE SAFE
FOR BOTH HUMANS AND ANIMALS,
AND FOR THE ENVIRONMENT
IS OUR TOP PRIORITY.

FAIR WORKING CONDITIONS

The largest portion of our apparel is produced in Asia. The global centre of competence plus cutting and sewing expertise is currently located there, including some of the most efficient production partners. This means some of our factories are far away from us, making it harder for us to monitor each step of the process. Achieving fair working conditions in these factories means we have to pick the best partners and work with them to help them reach our high standards for working conditions.

All our suppliers have to sign and commit to our Code of Conduct, a document that sets the social and ethical standards to be respected in all facilities manufacturing our products.

FAIR WEAR FOUNDATION

To ensure we are always putting the well-being of our associates first, we also partner with the most rigorous labour conditions expert in textiles that we know: Fair Wear Foundation. Fair Wear Foundation is an independent non-profit organisation with the mission to improve working conditions globally in the textile and apparel industries. We have been working with Fair Wear Foundation since 2013 to ensure the well-being of workers involved in the manufacturing of our textile products. FWF helps us monitor working conditions and audit our factories, it supports us in our relations with our suppliers, and it ensures we are subject to an annual review. In 2017, FWF assigned us the leader status – a level only given to brands who are doing exceptionally well and operating at an advanced level. FWF raises the bar with its requirements every year, and we're continually being challenged to do more to satisfy these increased standards. We're proud to say that we were again among "the leaders" in 2018 and 2019. This tells us we are on the right path!

Currently, 98% of our textile production is under monitoring for fair working conditions (the factories have either been audited by third party experts in workers' rights or are located in low-risk countries such as Italy and Germany).

Find out more about Fair Wear Foundation at fairwear.org.

MADE IN EUROPE

As an innovator and developer of technical equipment and gear for mountain sports, it remains our biggest challenge to work sustainably. Social responsibility for people and nature is a given.

Fair working conditions, high quality standards, shorter transport distances – all of this saves resources and is our highest priority in our search for appropriate production facilities in Europe.

We are working constantly on shifting more production facilities to Europe. When it comes to bindings and ski touring boots, 100% of production occurs in Europe; textiles are still in large part imported from Asia. However, we pay special attention here to ensure safe and fair working conditions in all our factories.

For more information on our sustainability work, read our latest sustainability report at dynafit.com/sustainability.

PRODUCTION SITE	VALUE % (FOB)
* Germany	29,9%
* Italy	27,2%

Taiwan	0,4%
Turkey	0,2%
Hong Kong	0,1%

HIGHER CHEMICAL STANDARDS

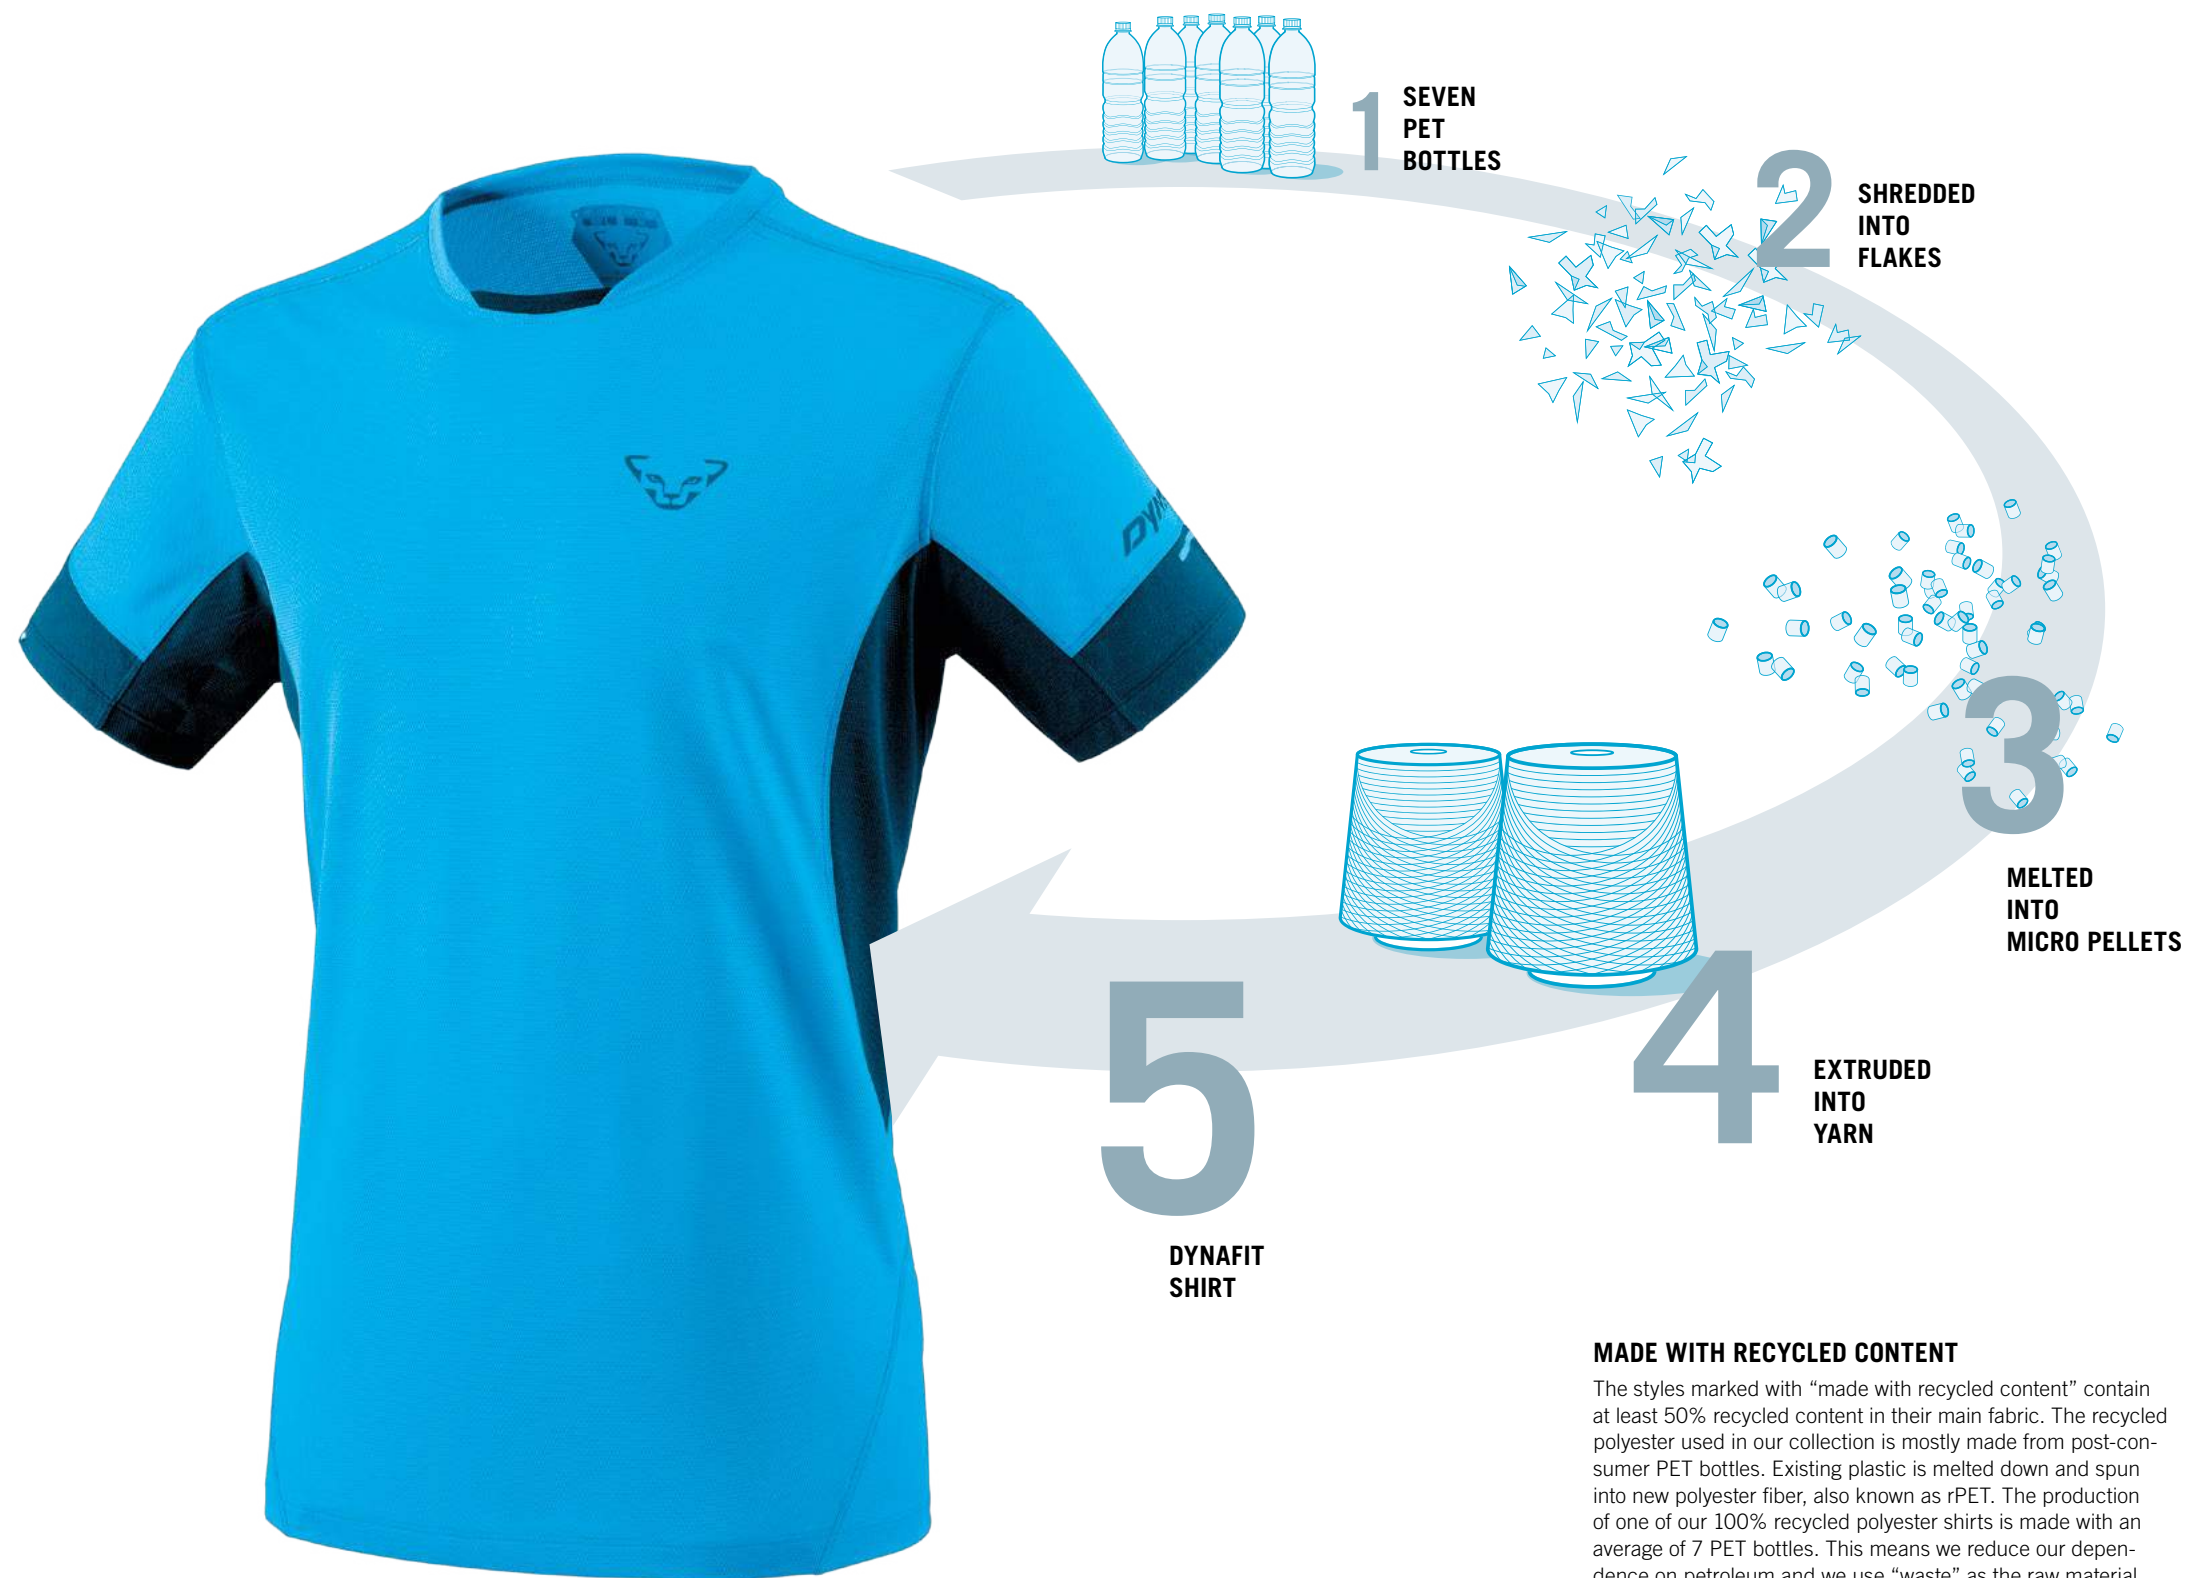

One of our priorities is making top performance products that are safe for both humans and the environment. Our goal is to control the entire lifecycle of our products – from raw material, through the production process, to the finished product. Our products are manufactured according to the Oberalp Chemical Policy. The document establishes a formal process to ban or limit the presence and use of hazardous substances in our products and production processes. This guarantees safety and compliance. However, we decided to go one step further, and our chemical policy is even stricter than the legal limits we must comply with. The policy includes a long list of chemicals that are excluded or limited from all our products (Restricted Substances List, RSL). All DYNAFIT products have to abide by the policy. It's a central part of the Conditions of Purchase with our suppliers, and it's mandatory at every stage of the production and distribution process.

We conduct chemical tests on our products to ensure they meet our high standards and we also work with expert partners and third-party certifications, such as bluesign®. We have been bluesign® system partners since 2011 and today a large portion of the fabrics used in our products are certified. bluesign® seeks to eliminate hazardous substances starting at the first stage of the manufacturing process and guarantees a safe and clean supply chain for the environment and for everyone involved at every step. We also work with an external and independent chemical laboratory to conduct tests on our products every season to ensure they are meeting our strict internal standards.

PFC-FREE DURABLE WATER REPELLENTS (DWR)

Perfluorocarbons (PFCs) are a type of chemical used to make products resistant to water, grease and stains. PFCs guarantee best-in-class performance for our technical apparel that needs to be both water-repellent and still allow humidity to exit. The problem with PFCs is that they are linked to negative health effects in humans, animals and nature. Both during the production and use phases, PFCs are released into the environment and are persistent. This means they degrade very slowly in nature and can also travel easily through water and wind. They then end up in our food chain. For this reason, since 2014 we have completely eliminated long-chain PFCs (C8) from all our products. All our water-repellent (DWR) products now either contain shorter-chain PFCs (C6) or are 100% PFC-free. We have started to increase the number of PFC-free repellency treatments in our products.

For our most technical products to be used in extreme weather conditions, it is necessary to apply C6 DWR treatment to ensure full weather protection and warmth. We are continuously investing to further reduce the use of C6-chemicals in our fabrics and significantly increase the number of PFC-free products without compromising on user-safety performance. Please note that contamination from PFCs cannot be excluded.

SUSTAINABLE COLLECTION
VERT SHIRT made from
100% recycled content:
breathable, light, sustainable.

MADE WITH RECYCLED CONTENT

The styles marked with "made with recycled content" contain at least 50% recycled content in their main fabric. The recycled polyester used in our collection is mostly made from post-consumer PET bottles. Existing plastic is melted down and spun into new polyester fiber, also known as rPET. The production of one of our 100% recycled polyester shirts is made with an average of 7 PET bottles. This means we reduce our dependence on petroleum and we use "waste" as the raw material. By using post-consumer recycled plastic to create our recycled fibers, we are also diverting plastic from ending up in landfills. Our supplier estimates that the production of recycled polyester saves more than 50% of energy and CO₂ emissions compared to virgin polyester, reducing the overall environmental impact of the product. Most of the shirts made of polyester are also recyclable, meaning their fabric can be fed back into the production cycle.

MATERIAL GLOSSARY

BREATHABILITY

Breathable material is permeable to water vapor, thus able to transfer moisture from the inside out. Breathability is measured with RET and MTRV values. The RET (resistance-evaporation-transmission) value indicates the water vapor resistance of a fabric. The lower the resistance, the more breathable the material. (e.g.: RET < 3 = highly breathable and RET > 20 = non-breathable). The MTRV (moisture-revapor-transmission rate) value is another criterium adapted to measure breathability: A lab test can calculate the amount of water vapor that can cross one square meter of fabric in 24 hours. The greater this amount, the more breathable the material. A MTRV value of > 10,000 is considered a good level of breathability.

AIR PERMEABILITY VALUE

Measures the wind resistance of a fabric: Values of <5 mm/s are considered good. Fabrics with windproof membranes have an air permeability value of 0 mm/sec.

WATER COLUMN

Water column is a pressure measurement. A water column of 20,000 mm indicates that the laminate fabric lets water through at a pressure of 20,000 mm.

ABRASION/SNAGGING RESISTANCE

Established by the Martindale test: The fabric is rubbed against wool in a circular motion; the level of resistance is determined by the number of times the operation can be repeated before the fabric tears.

PILLING RESISTANCE

Indicated with values from 1 (severe pilling) to 2–4 (moderate pilling) to 5 (very slight pilling). Tested with the Martindale method – the fabric sample is rubbed against itself and compared with standard results after 2,000 cycles.

MATERIAL SHORTCUTS

PA	Polyamid
PP	Polypropylen
CO	Cotton
EL/EA	Elasthan
PE	Polyehtylen
PES/PE	Polyester
PTFE	Polytetrafluorethylen

GORE-TEX® ACTIVE® WITH SHAKEDRY™ PRODUCT TECHNOLOGY

Through this technology the face fabric could be eliminated and a unique beading surface is created. This means no wetted out face fabric and constant water repellency and thus no additional weight pick-up. As the name says the garments shake dry.

Breathability:	RET < 3 (Training) resp. RET < 3 (Hiking)
Water Column:	23.000 mm

COMPOSITION:

Shell:	100% ePTFE
Backing:	100% PA
Weight:	49 g/m² (Training) resp. 78g/m² (Hiking)

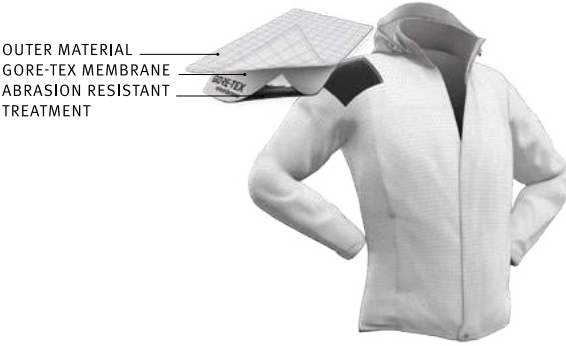

GORE-TEX PACLITE® PLUS PRODUCT TECHNOLOGY

Hope for the best, prepare for the worst. Being serious about your mountaineering adventure means carrying a back-up shell that's exceptionally packable und lightweight, very breathable, and protects you with the GUARANTEED TO KEEP YOU DRY™ promise. Proven to be abrasion resistant and very durable, with GORE-TEX® PALITE Plus garments you are ready for unexpected adventure.

Breathability:	RET < 9
Water Column:	28.000 mm

COMPOSITION:

Face Fabric:	100% PA
Membrane:	100% ePTFE
Backing:	100% PA
Weight:	74 g/m²

SHELLS & SOFTSHELLS

GORE-TEX® SHELLS

GORE-TEX® fabrics lead the way in waterproof protection, breathability and durability for technical outdoor apparel.

GORE-TEX® ACTIVE PRODUCT TECHNOLOGY

Garments made with the newest generation of the GORE-TEX® Active 3-layer product technology are lightweight, soft, quiet and extremely breathable. They deliver the waterproof and windproof performance of a hard shell with the pleasant touch and next to skin comfort of a soft shell.

Breathability:	RET < 3,5
Water Column:	23.000 mm

COMPOSITION:

Shell:	100% PA
Backing:	100% PA
Weight:	78 g/m²

BENEFITS:

- Extremely breathable, reduced sweat accumulation (RET <4)
- Durably waterproof and windproof
- Specially developed for high energy activities in all weather conditions
- Improved softness and next-to-skin comfort
- Quieter and lighter

DYNA-SHELL

DYNA-SHELL 3 LAYER

DYNA-SHELL 3 LAYER

- Water column: 20.000 mm
- Breathability: 20.000 g/m²/day
- Windproof
- Nylon face fabric
- Lightweight
- Durably water repellent
- Packable

DYNA-SHELL 2.5 LAYER

DYNA-SHELL 2.5 LAYER

- Water column: 20.000 mm
- Breathability: 20.000 g/m²/day
- Windproof
- Nylon face fabric
- Lightweight
- Durably water repellent
- Packable

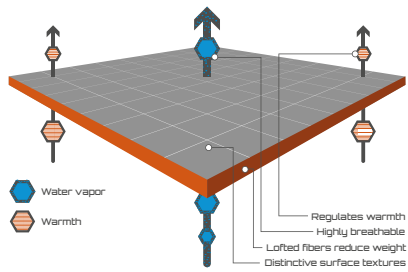

INSULATION & THERMALS

POLARTEC® ALPHA®

- Overheating is underperforming. POLARTEC® ALPHA® allows a free exchange of air to keep you warm, comfortable and focused.
- Breathable to provide comfort in all activities
 - Dries quickly to minimize heat loss
 - Insulates even when wet
 - Versatile; appropriate for a broad range of activities as a mid- or outer-layer
 - Wind resistant
 - Machine washable

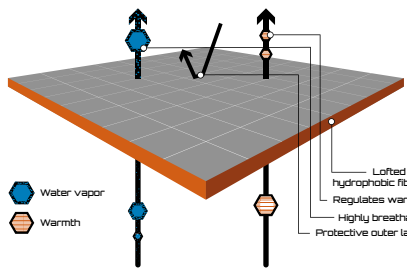

Composition: 100% PES
Weight: 60 g/m² and 100 g/m²

POLARTEC® POWER GRID

Polartec® Power Grid™ fabrics are designed to keep your skin dry when you sweat featuring a bi-component knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly. These fabrics weigh less, take up less pack space, and deliver more insulation and breathability than most fabrics in their class.

Composition: 100% PES
Weight: 224 g/m²
Pilling Resistance: 4
Snagging Resistance: 4

DYNA-FILL

DYNA-FILL insulation replicates the structure of down in a lightweight continuous synthetic insulation filament, offering warmth, packability, look & feel of down but with the advantage of synthetic insulation to keep you warm even when wet.

TECHNICAL FABRICS & FABRIC TREATMENTS

DYNA-SHELL

DYNA-SHELL ULTRALIGHT

- Microdenier woven nylon
- Ultra lightweight
- Wind resistant
- Highly breathable
- Soft handfeel
- Durably water repellent
- Packable

DYNA-SHELL STRETCH

- Stretch woven nylon
- High abrasion resistance
- Wind resistant
- 100% breathable
- Softshell handfeel
- Durably waterrepellent
- High air permeability

DRYARN

Dryarn® is an innovative microfiber, which is the lightest in the natural world, which is water-repellent, breathable as well as bacteriostatic.

LIGHTNESS:

Dryarn® is super light – meaning that the fiber weights 32% less than wool and 34% less than Polyester.

THERMAL COMFORT:

Dryarn® offers excellent moisture transport to support a healthy microclimate on the skin. Sweat is immediately transported to the outside, so your body stays dry and warm in every conditions.

DRY SKIN:

Dryarn® is extremely breathable, evaporating sweat to the outside and preventing that the fabric gets soaked. Thus the body stays warm during normal and exhausting activities.

DRIRELEASE®

A patented performance sports material that has the look and feel of classic cotton, but keeps you dry, cool, comfortable and fresh.

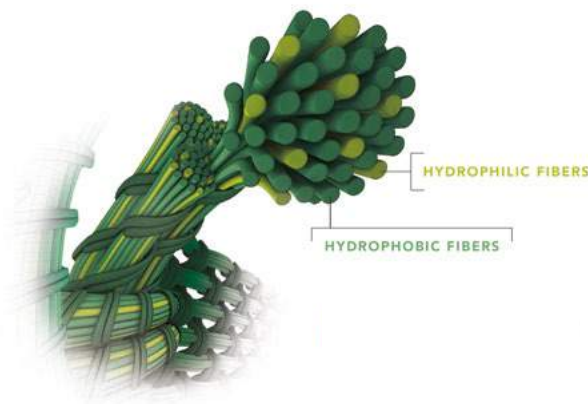

PATENTED FOR PERFORMANCE

dr release fabrics offer a patented blend of 85-90% synthetic, hydrophobic (water repelling) fibers and 10-15% natural, hydrophilic (water absorbing) fibers. The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly. That's why clothing made with DR always feels soft and stays dry.

BACTERIOSTATIC:

Dryarn® is a naturally bacteriostatic fiber, it reduces the risk of irritation, allergies and rashes, as well as reducing odors.

- High thermo-insulating capacity
- Excellent moisture transport to support a healthy microclimate on the skin, both for summer and winter seasons
- Extremely lightweight, colorfast and durable
- A naturally “bacteriostatic” fibre, it reduces the risk of irritation, allergies and rashes, as well as reducing odors

CARVICO

Carvico are Italian engineered stretch fabrics created for high performance athletic apparel. They can correctly sustain muscles, increasing efficiency of movement and reducing muscle fatigue.

- 4 Way stretch
- Quick drying
- Extremely high pilling and abrasion resistance

ELASTIC INTERFACE®

Elastic interface® is an Italy based specialist for performance cycling pads. Their lightweight cycling pads are engineered to maximize freedom of movement, saddle stability and protection, to avoid any discomfort, inconvenience and pain. Their MTB Performance 3 cycling pad used in our products was specifically designed to meet the requirements of long distance mountain biking. 100% of their production is located in Italy.

POLYGIENE®

Polygiene is a permanent odor control garment treatment. It prevents the growth of odor-causing bacteria and fungi at the source. A low concentration of silver salt which has antimicrobial properties is integrated in the fabric. It is not nanosilver and is only active on the textiles itself. The treatment is bluesign® approved which means it meets rigorous independent environmental and product life cycle standards.

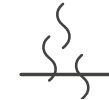

S-TECH

Thanks to the seamless S-Tech construction, the elastic material adapts perfectly to the body. This provides increased freedom of movement, improved moisture management and an increased level of comfort.

APPAREL

PACKABLE
Klein verpackbares Produkt.

BREATHABLE
Atmungsaktives Funktionsmaterial.

WIND PROOF
Funktionsmaterial mit winddichter Membran.

WIND RESISTANT
Eine engmaschige Materialkonstruktion hält den Wind weitestgehend vom Körper ab und ermöglicht zeitgleich eine gute Luftzirkulation.

WATER PROOF
Eine engmaschige Materialkonstruktion hält den Wind weitestgehend vom Körper ab und ermöglicht zeitgleich eine gute Luftzirkulation.

WATER REPELLANT
Wasserabweisend ausgerüstetes Funktionsmaterial.

4-WAY-STRETCH
Funktionsmaterial mit 4-Wege Elastizität für mehr Bewegungsfreiheit.

EXPANDABLE BACK
Der geöffnete Reißverschluss am Rücken ermöglicht das Tragen des Rucksacks unter der Jacke.

VENTILATION
Belüftung dank laserperforierten Öffnungen unter den Armen oder am Rücken.

QUICK DRY
Extra schnell trocknendes Funktionsmaterial.

EQUIPMENT

SPEED POLE FIXATION
Seitliche Stockfixierung am Rucksack. Die Stöcke werden mit der Spitze voraus in die dafür vorgesehene Tasche gesteckt und mit Hilfe des Gummizugs fixiert.

POLE FIXATION
Stöcke können hinten am Rucksack oder der Tasche mit Hilfe von Schlaufen und Gummifixierungen befestigt werden.

COMPRESSION STRAP
Der Rucksack ist durch Ziehen der Schnüre je nach Inhalt auf ein Minimum an Volumen komprimierbar.

SAFETY BOX
Eine leicht zugängliche Klettverschluss-Tasche an der unteren Seite des Rucksacks ermöglicht den Zugang zum Inhalt ohne den Rucksack ablegen zu müssen. Sehr gut geeignet z.B. für Steigeisen.

HELMET ATTACHMENT
Leichte, dehnbare Helmhalterung - einfach an der Unterseite des Rucksacks zu entnehmen, um den Helm schnell zu verstauen.

WIND SHIELD
Eine integrierter Windschutz in der oberen linken Tasche am Schultergurt kann bei Bedarf verwendet werden, um den Oberkörper vor Wind zu schützen.

ADJUSTABLE POLE LENGTH
Stöcke sind in der Länge variabel und können je nach Einsatz und Körpergröße von 115 - 135cm eingestellt werden.

FOOTWEAR

ALPINE ROCKER
Durch die Rocker-Mittelsohle sind die Ferse und die Spitze im Vorfußbereich nach oben gebogen, was zu einer flüssigen und dynamischen Ferse-zu-Vorfuß-Laufbewegung führt.

INVISIBLE LACING
Elastische Lasche, um die Schuhbänder vor Abnutzung zu schützen und Schmutz wie Blätter und Steine fernzuhalten.

POMOCA GLIDING PATH
Die S-förmige Stollenkonstruktion - der Gleitpfad - unterstützt das natürliche Abrollverhalten des Fußes, sorgt für ein reibungsloses Abrollen und reduziert die Deformierungsenergie. Eine Traktionszone neben dem Gleitpfad bietet durch die Stollenstruktur. Halt auf unterschiedlichem Terrain.

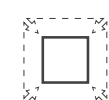

VIBRAM LUGS
Spezielles Design der Vibram-Stollen. Diese passen sich individuell an den Boden an - für einen besseren Grip.

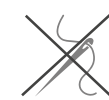

DNA VOLUME REDUCER
DNA-Feature: Ersatzeinlegesohle, die das Volumen des Schuhs reduziert - für eine noch schlankere und engere Rennpassform.

DYNASHELL GAITOR
Wasserdichte Gamasche, welche die Füße vor Felsen, Schnee und Schlamm schützt.

ADAPTIVE TONGUE/FIT SYSTEM
Anpassungsfähige Schuhlasche mit 3-Lagen-Konstruktion aus Fallschirmmaterial - umhüllt den Fuß und passt sich beim Laufen an.

SEAMLESS TONGUE
Nahtlose Schuhlasche zur Vermeidung von Scheuerstellen.

MAXIMUM CUSHIONING
Maximale Dämpfung für maximalen Laufkomfort.

CSR

PFC-FREE
PFC-freie Imprägnierung.

MADE WITH RECYCLED CONTENT
Styles mit mindestens 50% recycletem Anteil im Hauptmaterial.

MADE IN EUROPE
Hergestellt in Europa.

B2B PORTAL

DEIN DIREKTER DRAHT ZU DYNAFIT

Unser B2B-Portal ist ein Onlineshop für Businesskunden. Im Gegensatz zu E-Mail- oder Faxbestellungen bietet die Plattform sofort eine Verfügbarkeitsübersicht, weil das System mit unserer Warenwirtschaft verbunden ist und eine tägliche Aktualisierung erfolgt. Jeder Händler, der sich bei uns einen Zugang holt, kann rund um die Uhr bestellen und sich Marketingmaterialien wie Bilder, Videos, Workbooks u. v. m. herunterladen. Webseite: serviceportal.oberalp.biz

WARUM DU UNSER B2B-PORTAL VERWENDEN SOLLTEST

- Bestellmöglichkeiten zu jeder Tages- und Nachtzeit, unabhängig von unseren Bürozeiten
- Lieferung erfolgt frachtfrei und ohne Mindermengenzuschlag
- Einfache Übersicht über die verfügbaren Größen und Farben
- Zeitgemäße, einfache und schnelle Abwicklung – keine Wartezeiten am Telefon
- Druckmöglichkeit und elektronische Archivierung aller Aufträge
- Download aller Bilder, Produktbeschreibungen, Preislisten, Kataloge (PDF-Format), Videos
- Möglichkeit der Sendungsverfolgung der getätigten Aufträge
- Überblick über alle Aufträge, egal ob über B2B oder anderweitig getätigt

WIE DU DICH IM B2B-PORTAL REGISTRIERST

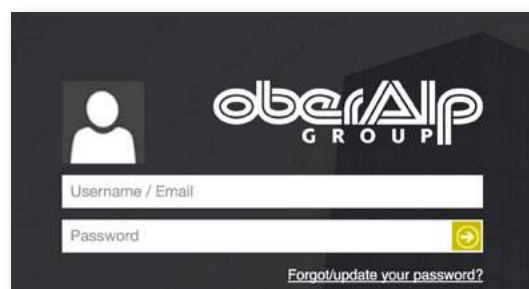

1

Ruf über deinen Webbrowser unsere Homepage dynafit.com auf und wähle im Footerbereich im rechten Block den Punkt „B2B / PRESS PORTAL“ aus oder gib direkt die Adresse serviceportal.oberalp.biz in deinen Browser ein.

2

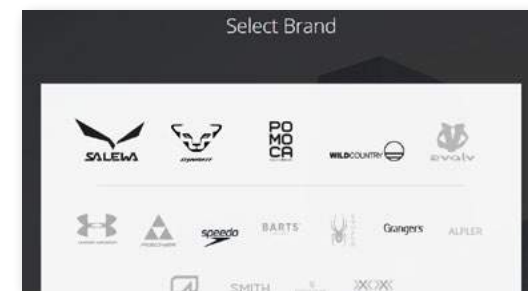

Fülle das Neukunden-Registrierungsformular mit allen notwendigen Daten aus – du erhältst innerhalb von 24 Stunden deine Zugangsdaten.

3

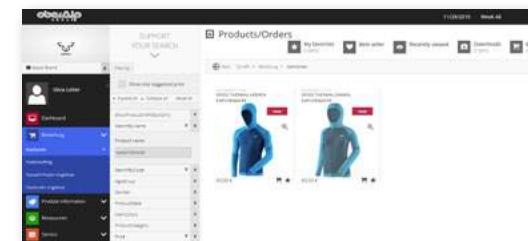

Unter serviceportal.oberalp.biz gelangst du zur Abfrage deiner Zugangsdaten. Gib den Usernamen und das Passwort ein. Klicke anschließend auf den Pfeil, um dich einzuloggen.

4

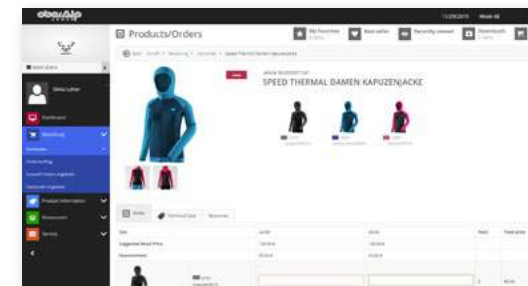

Im B2B-Portal bieten wir alle, im jeweiligen Land verfügbaren Artikel der OBERALP Gruppe an. Wähle zuerst die gewünschte Kollektion aus, indem du auf die Marken klickst. Du kannst jede Kollektion auswählen, für die du freigeschaltet bist.

5

Du kannst nach Artikeln suchen, indem du in der Rubrik „Bestellung“ auf „Nachorder“ klickst und dort den Artikelnamen (auch ein Teil des Namens reicht aus), oder die Artikelnummer eingibst. Klicke auf „Search“, um dir alle relevanten Suchergebnisse anzeigen zu lassen.

6

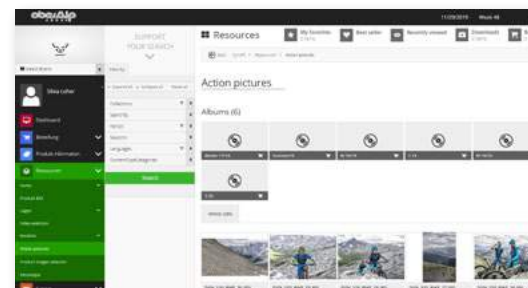

Klicke einen Artikel an und du siehst in der nächsten Übersicht, ob der Artikel in den verschiedenen Farbvarianten verfügbar ist. Ist das Kästchen grün umrandet, so ist der Artikel sofort verfügbar und es sind noch mindestens zehn Stück des Artikels auf Lager. Ist die Menge auf Lager niedriger als zehn Stück, ist das Feld orange umrandet. Sollte der Artikel nicht sofort, aber innerhalb der nächsten vier Wochen lieferbar sein, ist pro Feld ein Informationshinweis mit einem kleinen „i“ und der voraussichtlichen Lieferwoche hinterlegt. Wird eine bestimmte Größe nicht angezeigt, ist diese nicht mehr vorhanden. Gib einfach die gewünschte Mengen in die Felder ein und klicke auf das Feld „In den Warenkorb“.

7

Wiederhole Schritt 5 und 6 für alle Artikel, die du bestellen willst. Die Bestellungen landen im Warenkorb. Um die Bestellung abzuschließen, geh zum Warenkorb und wähle „Zur Kasse“. Nach Angabe

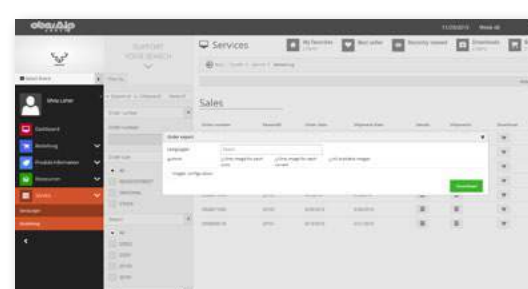

einer eventuell abweichenden Lieferadresse und dem Klick auf „Bestellung bestätigen“ ist der Vorgang abgeschlossen und du erhältst eine Auftragserfassungs-E-Mail.

8

Du kannst dir auch Produktbilder, Actionbilder, Workbooks, Logos, Videos sowie unseren Service Guide downloaden. Klicke dafür einfach im linken Menübereich auf „Ressourcen“ und öffne den gewünschten Menüpunkt. Nun kannst du die verschiedensten Materialien downloaden.

9

Du kannst dir deine Order auch im Nachhinein nochmal ansehen, ausdrucken und die zugehörigen Produktbilder zu deiner Order downloaden. Klicke dazu auf „Service“ und „Bestellung“. Hier siehst du all deine Bestellungen. Mit Klick auf Download kannst du dir dein Ordersheet und die dazugehörigen Bilder downloaden.
