

DYNAFIT

SUMMER 2021

**TRAIL RUNNING
ATHLETIC MOUNTAINEERING**

CONTENT

All paper of this DYNAFIT Workbook comes from 100 % reclaimed or re-used material.
FSC® helps take care of forests and the people and wildlife that call them home.

For the printing of this workbook only mineral oil-free ecological printing inks were used, which are 100 % degradable.

We offset CO₂ emissions of our workbooks with certified climate-protection projects. To that end, all CO₂ emission sources are measured. That includes paper pulp, paper production, as well as printing plates and ink that are used for printing. CO₂ emissions that are created in printing are offset by certified climate-protection projects in other areas. Every order entered has an individual tracking number that is integrated into the upper logo. With this ID, the climate neutrality of the printed product from the point of ordering to the offset with CO₂ can be traced.

GRIP

VIBRAM® MEGAGRIP

The new high-performance rubber compound featuring unparalleled grip on wet and dry surfaces, rugged longevity and optimal ground adaptability.

POMOCA –
70 YEARS OF SOLE MAKING HISTORY

The newly developed rubber compound and outsole construction provide optimum traction for a smooth, energy-efficient gait. Its biomechanical design promotes a natural motion of the foot and prevents dirt and rocks from lodging in the tread and sticking to lugs.

GRIP – POMOCA

FIT

DNA (SUPER MINIMAL VOLUME)

Full control and sensitivity. Tight and precise like a glove to perform at a high level. Very low shoe volume.

MINIMAL VOLUME

Precise fit which allows a proper control and support. Low shoe volume.

MEDIUM VOLUME

Wrapping effect but without any constraints in order to keep a high versatility of usage. Medium shoe volume.

MAXIMUM VOLUME

Stability and comfort. More space for a proper blood circulation on longer distances. Maximum shoe volume.

FEATURES OF ALL DYNAFIT SHOES

BALLISTIC BUMPER

This reduces the effect of impacts at the toes and forefoot while at the same time improving the durability of the shoe.

HEEL PRELOADER

The heel preloader construction ensures comfort and precision support. Diagonal reinforcements at the heel support the foot during the running gait and improve fit in the heel area.

TRAIL RUNNING

Mountain runs, running over alpine terrain... this is Trail Running. Whether steep vertical climbs, ultra distances, or simply diverse and technical trails with roots, mud and scree - Trail Running athletes have one thing in common: They move fast and light in the mountains. The challenge for gear is clear: Intelligently lightweight, athletic fit, long-lasting durability, and reliable performance and protection for the athlete. Simply put - Trail Running athletes demand products with an outstanding performance-to-weight ratio for any kind of alpine terrain.

ATHLETIC MOUNTAINEERING

The evolution of mountain sports, a category between mountain running and mountaineering. Athletic Mountaineers climb peaks dynamically light and fast. Whether mountains higher than 3,000 meters, numerous peaks on one day, or multi-day crossings, what is demanded in first order is versatility, speed and agility. Constantly changing conditions and diverse alpine terrain offer special challenges to gear. What is needed are lightweight products that are minimal in size but maximal in performance, plus multifunctionality that offers athletes top protection. In short, products that combine low weight, comfort and versatility.

BIKE

The combination of various mountain sports is now a new type of alpinism. The lines between the individual types of modern mountain endurance sports are increasingly fuzzy. Various disciplines such as Trail Running, mountaineering, mountain biking and ski mountaineering are becoming more adaptable and, depending on desire and mood, can be linked into one much larger mountain adventure. In sync with the outdoor world this also means that athletes gladly abandon using a car – which can increase the route's distance by a few kilometers. With mountain bikes, training often starts out right from your front door, heading out over meadows, across fields and through woods at a dynamic

pace uphill before the last meters to the summit on rocky terrain demand technical expertise. For these modern, athletic mountain athletes, DYNAFIT has developed a technical, intelligently engineered Bike Collection that is as multi-faceted as athletes themselves: Lightweight with a small packsize, versatile in use, and at the same time very comfortable for all different types of movement. Bike + X – This is the next generation of Athletic Mountaineering.

ESSENTIALS

Get the most out of your downdays! Spending active time in the mountains is our passion and source of energy. But sometimes our bodies need a break, conditions restrict us to go out or we just want to have a good day in the city. But being away from the mountains doesn't mean we can't live an active lifestyle. The 24/7 collection offers various stylish and functional products for each time of the day in an urban environment and reflects our passion for sports and outdoors. Urban. Tech. Light.

TIGHT FIT

- Made of stretch/elastic fabrics
- Fit next to the skin

These close fitting garments optimize the moisture management and thermal efficiency.

ATHLETIC FIT

- Anatomic shape
- Freedom of movement
- Lower volume for reduced bulk

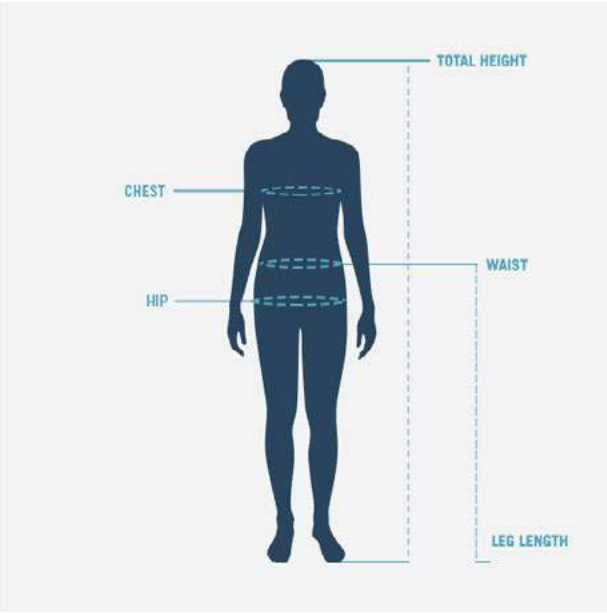

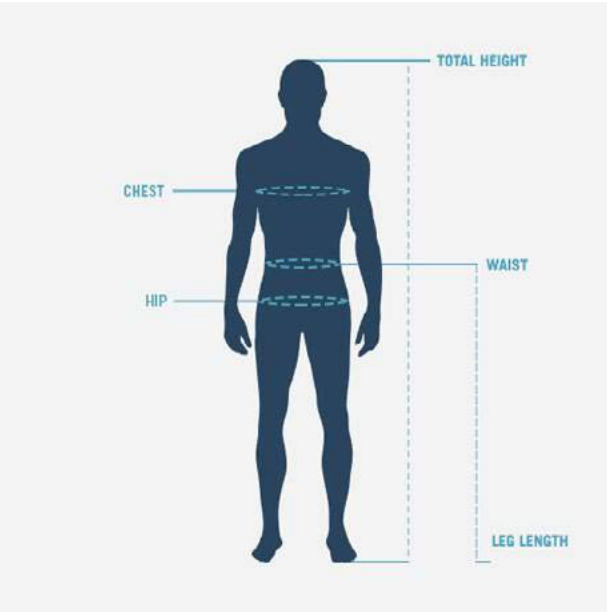

These closer-fitting pieces layer well under other garments.

SPORTIVE FIT

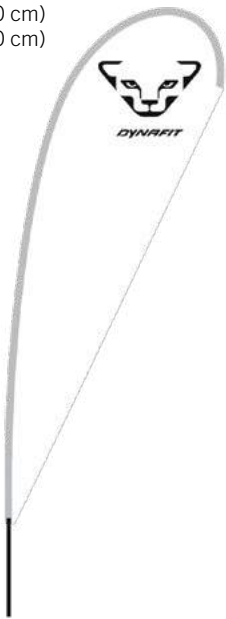

- Anatomic shape
- Maximum range of motion

Easy layering under these relaxed fitting items extends seasonal versatility and comfort.

CORPORATE SOCIAL RESPONSIBILITY

We see it as our duty to equip passionate mountain sport athletes with innovative, premium products for unforgettable experiences in the outdoors. In doing so, it is a given for us to also assume responsibility – certainly for the safety of the athletes, but also for protecting our environment and fellow human beings.

Corporate responsibility comprises not only sustainable business practices along the entire value chain but also equally transparent communication with all relevant stakeholders in order to continually learn and improve.

ENSURING OUR MATERIALS AND PRODUCTS ARE SAFE FOR BOTH HUMANS AND ANIMALS, AND FOR THE ENVIRONMENT IS OUR TOP PRIORITY.

FAIR WORKING CONDITIONS

The largest portion of our apparel is produced in Asia. The global centre of competence plus cutting and sewing expertise is currently located there, including some of the most efficient production partners. This means some of our factories are far away from us, making it harder for us to monitor each step of the process. Achieving fair working conditions in these factories means we have to pick the best partners and work with them to help them reach our high standards for working conditions.

All our suppliers have to sign and commit to our Code of Conduct, a document that sets the social and ethical standards to be respected in all facilities manufacturing our products.

FAIR WEAR FOUNDATION

To ensure we are always putting the well-being of our associates first, we also partner with the most rigorous labour conditions expert in textiles that we know: Fair Wear Foundation. Fair Wear Foundation is an independent non-profit organisation with the mission to improve working conditions globally in the textile and apparel industries. We have been working with Fair Wear Foundation since 2013 to ensure the well-being of workers involved in the manufacturing of our textile products. FWF helps us monitor working conditions and audit our factories, it supports us in our relations with our suppliers, and it ensures we are subject to an annual review. In 2017, FWF assigned us the leader status – a level only given to brands who are doing exceptionally well and operating at an advanced level. FWF raises the bar with its requirements every year, and we're continually being challenged to do more to satisfy these increased standards. We're proud to say that we were again among "the leaders" in 2018 and 2019. This tells us we are on the right path!

Currently, 98% of our textile production is under monitoring for fair working conditions (the factories have either been audited by third party experts in workers' rights or are located in low-risk countries such as Italy and Germany).

Find out more about Fair Wear Foundation at fairwear.org.

MADE IN EUROPE

As an innovator and developer of technical equipment and gear for mountain sports, it remains our biggest challenge to work sustainably. Social responsibility for people and nature is a given.

Fair working conditions, high quality standards, shorter transport distances – all of this saves resources and is our highest priority in our search for appropriate production facilities in Europe.

We are working constantly on shifting more production facilities to Europe. When it comes to bindings and ski touring boots, 100% of production occurs in Europe; textiles are still in large part imported from Asia. However, we pay special attention here to ensure safe and fair working conditions in all our factories.

For more information on our sustainability work, read our latest sustainability report at dynafit.com/sustainability.

PRODUCTION SITE	VALUE % (FOB)

HIGHER CHEMICAL STANDARDS

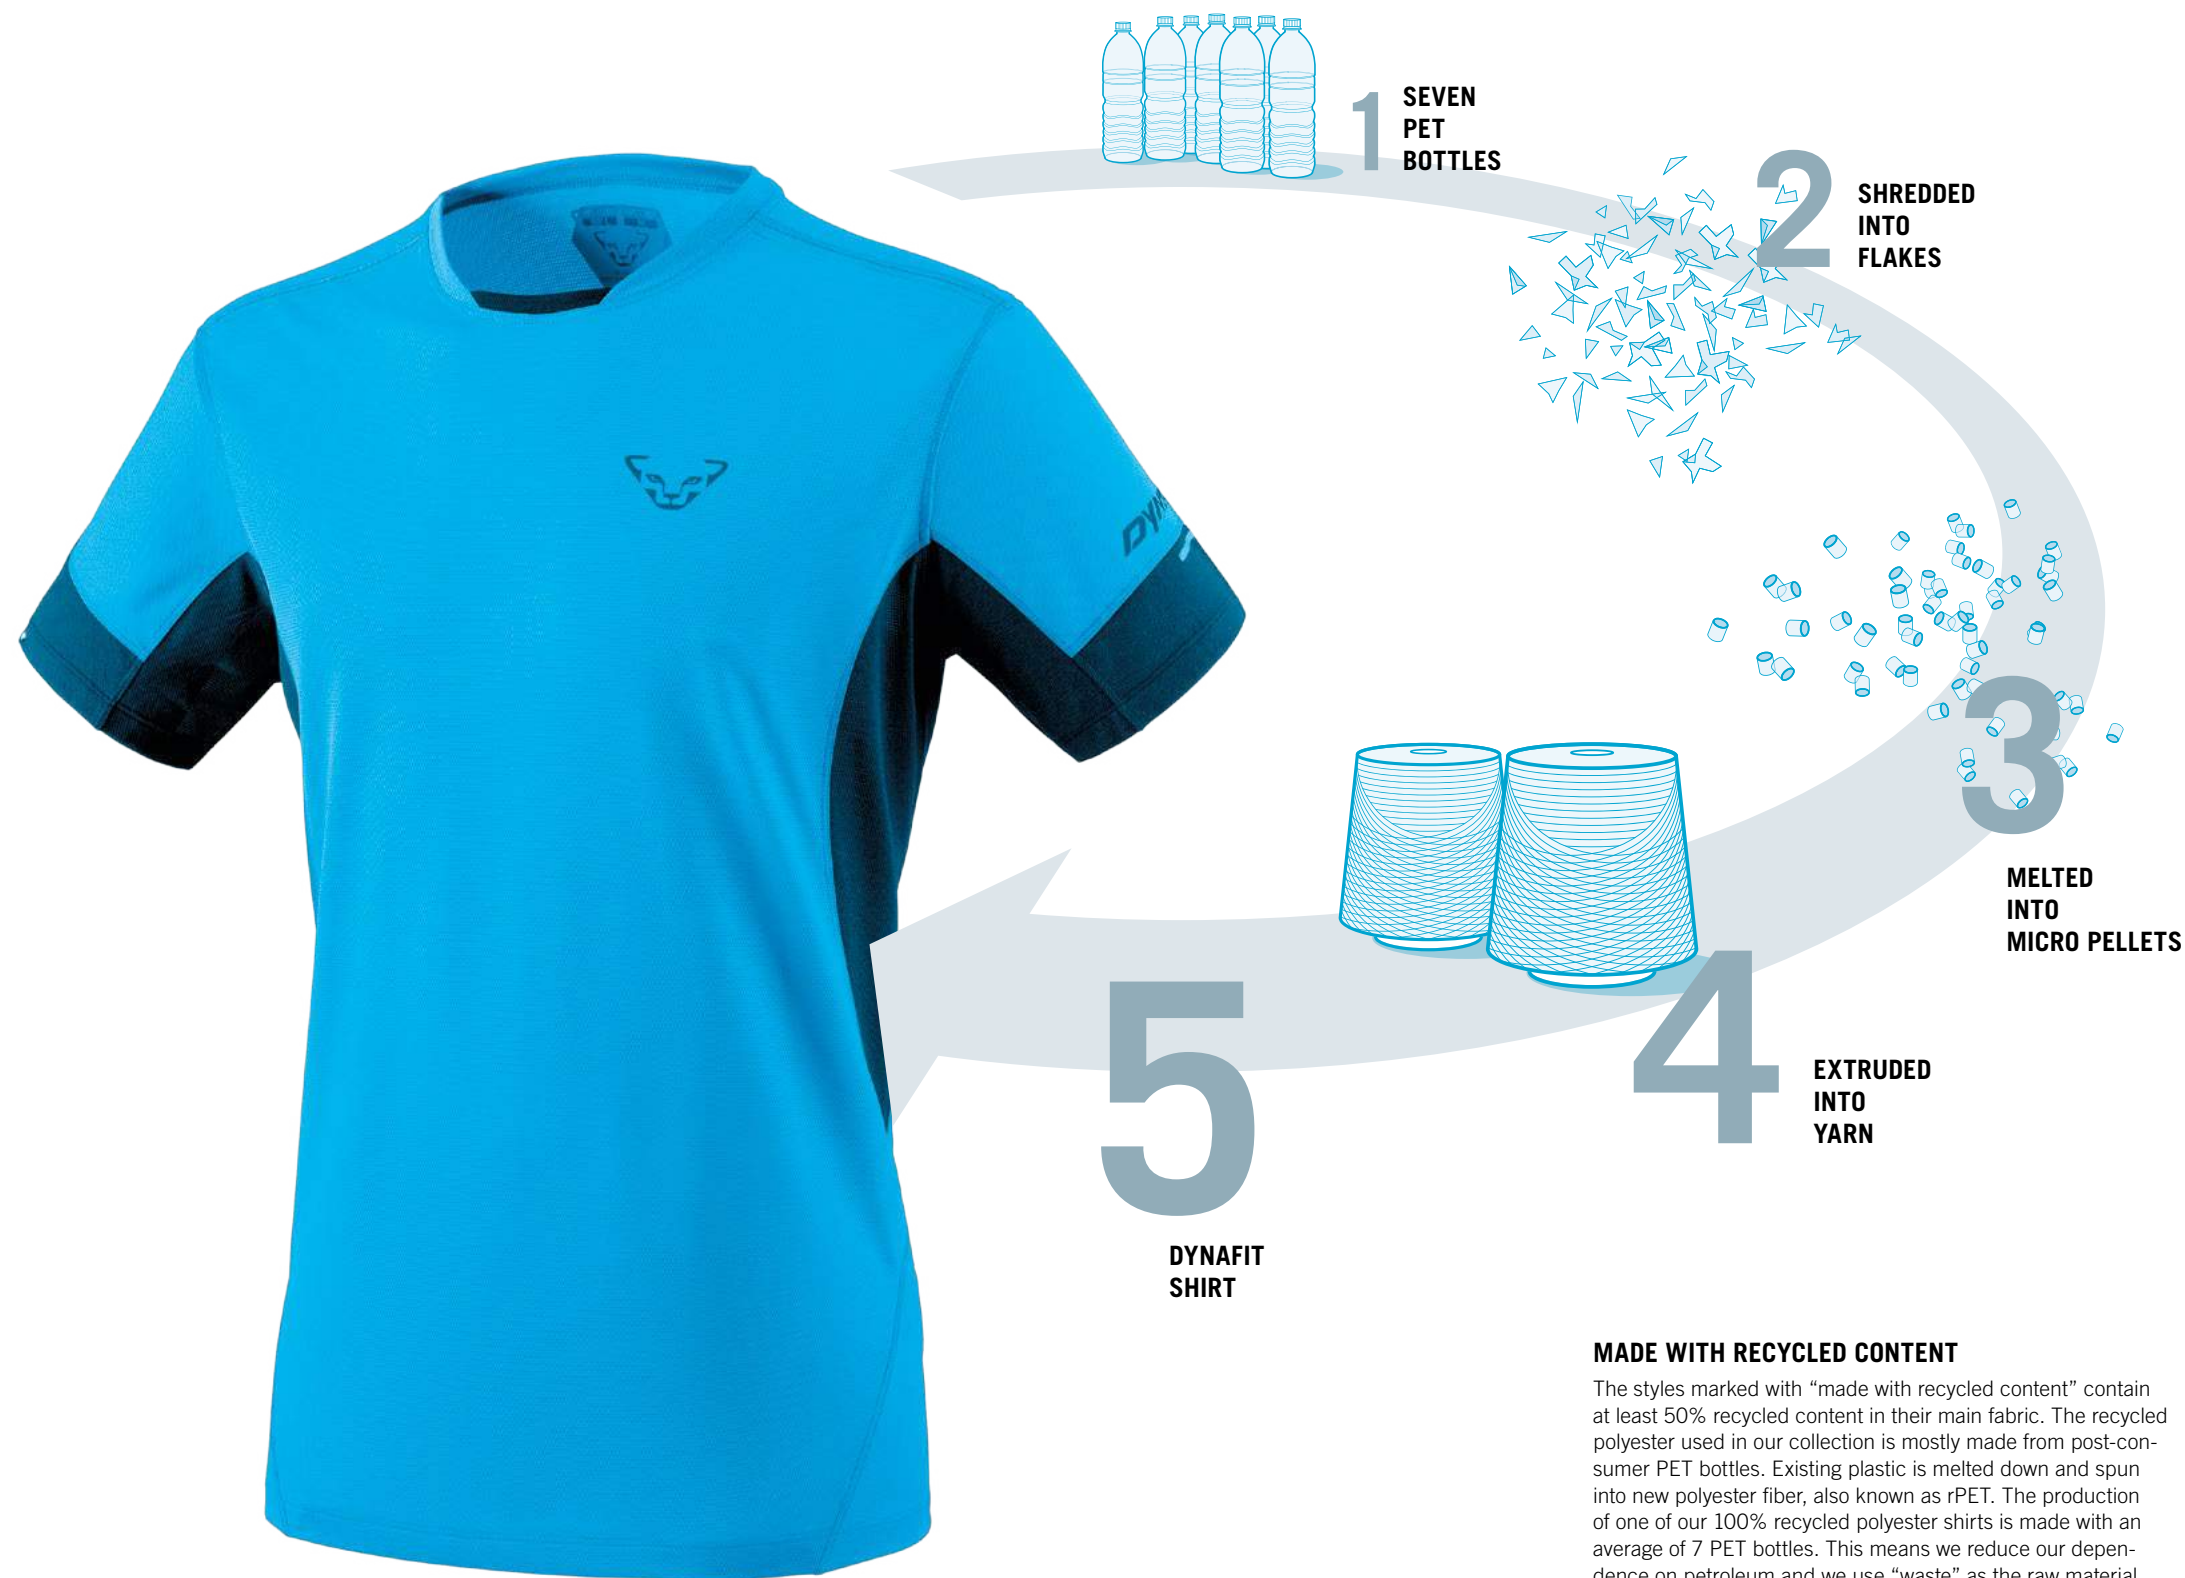

One of our priorities is making top performance products that are safe for both humans and the environment. Our goal is to control the entire lifecycle of our products – from raw material, through the production process, to the finished product. Our products are manufactured according to the Oberalp Chemical Policy. The document establishes a formal process to ban or limit the presence and use of hazardous substances in our products and production processes. This guarantees safety and compliance. However, we decided to go one step further, and our chemical policy is even stricter than the legal limits we must comply with. The policy includes a long list of chemicals that are excluded or limited from all our products (Restricted Substances List, RSL). All DYNAFIT products have to abide by the policy. It's a central part of the Conditions of Purchase with our suppliers, and it's mandatory at every stage of the production and distribution process.

We conduct chemical tests on our products to ensure they meet our high standards and we also work with expert partners and third-party certifications, such as bluesign®. We have been bluesign® system partners since 2011 and today a large portion of the fabrics used in our products are certified. bluesign® seeks to eliminate hazardous substances starting at the first stage of the manufacturing process and guarantees a safe and clean supply chain for the environment and for everyone involved at every step. We also work with an external and independent chemical laboratory to conduct tests on our products every season to ensure they are meeting our strict internal standards.

PFC-FREE DURABLE WATER REPELLENTS (DWR)

Perfluorocarbons (PFCs) are a type of chemical used to make products resistant to water, grease and stains. PFCs guarantee best-in-class performance for our technical apparel that needs to be both water-repellent and still allow humidity to exit. The problem with PFCs is that they are linked to negative health effects in humans, animals and nature. Both during the production and use phases, PFCs are released into the environment and are persistent. This means they degrade very slowly in nature and can also travel easily through water and wind. They then end up in our food chain. For this reason, since 2014 we have completely eliminated long-chain PFCs (C8) from all our products. All our water-repellent (DWR) products now either contain shorter-chain PFCs (C6) or are 100% PFC-free. We have started to increase the number of PFC-free repellency treatments in our products.

For our most technical products to be used in extreme weather conditions, it is necessary to apply C6 DWR treatment to ensure full weather protection and warmth. We are continuously investing to further reduce the use of C6-chemicals in our fabrics and significantly increase the number of PFC-free products without compromising on user-safety performance. Please note that contamination from PFCs cannot be excluded.

SUSTAINABLE COLLECTION
VERT SHIRT made from
100% recycled content:
breathable, light, sustainable.

MADE WITH RECYCLED CONTENT

The styles marked with "made with recycled content" contain at least 50% recycled content in their main fabric. The recycled polyester used in our collection is mostly made from post-consumer PET bottles. Existing plastic is melted down and spun into new polyester fiber, also known as rPET. The production of one of our 100% recycled polyester shirts is made with an average of 7 PET bottles. This means we reduce our dependence on petroleum and we use "waste" as the raw material. By using post-consumer recycled plastic to create our recycled fibers, we are also diverting plastic from ending up in landfills. Our supplier estimates that the production of recycled polyester saves more than 50% of energy and CO₂ emissions compared to virgin polyester, reducing the overall environmental impact of the product. Most of the shirts made of polyester are also recyclable, meaning their fabric can be fed back into the production cycle.

MATERIAL GLOSSARY

BREATHABILITY

Breathable material is permeable to water vapor, thus able to transfer moisture from the inside out. Breathability is measured with RET and MTRV values. The RET (resistance-evaporation-transmission) value indicates the water vapor resistance of a fabric. The lower the resistance, the more breathable the material. (e.g.: RET < 3 = highly breathable and RET > 20 = non-breathable). The MTRV (moisture-revapor-transmission rate) value is another criterium adapted to measure breathability: A lab test can calculate the amount of water vapor that can cross one square meter of fabric in 24 hours. The greater this amount, the more breathable the material. A MTRV value of > 10,000 is considered a good level of breathability.

AIR PERMEABILITY VALUE

Measures the wind resistance of a fabric: Values of <5 mm/s are considered good. Fabrics with windproof membranes have an air permeability value of 0 mm/sec.

WATER COLUMN

Water column is a pressure measurement. A water column of 20,000 mm indicates that the laminate fabric lets water through at a pressure of 20,000 mm.

ABRASION/SNAGGING RESISTANCE

Established by the Martindale test: The fabric is rubbed against wool in a circular motion; the level of resistance is determined by the number of times the operation can be repeated before the fabric tears.

PILLING RESISTANCE

Indicated with values from 1 (severe pilling) to 2–4 (moderate pilling) to 5 (very slight pilling). Tested with the Martindale method – the fabric sample is rubbed against itself and compared with standard results after 2,000 cycles.

MATERIAL SHORTCUTS

PA	Polyamid
PP	Polypropylen
CO	Cotton
EL/EA	Elasthan
PE	Polyehtylen
PES/PE	Polyester
PTFE	Polytetrafluorethylen

GORE-TEX® ACTIVE® WITH SHAKEDRY™ PRODUCT TECHNOLOGY

Through this technology the face fabric could be eliminated and a unique beading surface is created. This means no wetted out face fabric and constant water repellency and thus no additional weight pick-up. As the name says the garments shake dry.

Breathability:	RET < 3 (Training) resp. RET < 3 (Hiking)
Water Column:	23.000 mm

COMPOSITION:

Shell:	100% ePTFE
Backing:	100% PA
Weight:	49 g/m² (Training) resp. 78g/m² (Hiking)

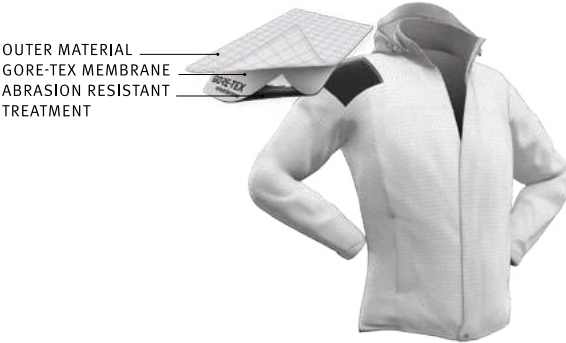

GORE-TEX PACLITE® PLUS PRODUCT TECHNOLOGY

Hope for the best, prepare for the worst. Being serious about your mountaineering adventure means carrying a back-up shell that's exceptionally packable und lightweight, very breathable, and protects you with the GUARANTEED TO KEEP YOU DRY™ promise. Proven to be abrasion resistant and very durable, with GORE-TEX® PALITE Plus garments you are ready for unexpected adventure.

Breathability:	RET < 9
Water Column:	28.000 mm

COMPOSITION:

Face Fabric:	100% PA
Membrane:	100% ePTFE
Backing:	100% PA
Weight:	74 g/m²

SHELLS & SOFTSHELLS

GORE-TEX® SHELLS

GORE-TEX® fabrics lead the way in waterproof protection, breathability and durability for technical outdoor apparel.

GORE-TEX® ACTIVE PRODUCT TECHNOLOGY

Garments made with the newest generation of the GORE-TEX® Active 3-layer product technology are lightweight, soft, quiet and extremely breathable. They deliver the waterproof and windproof performance of a hard shell with the pleasant touch and next to skin comfort of a soft shell.

Breathability:	RET < 3,5
Water Column:	23.000 mm

COMPOSITION:

Shell:	100% PA
Backing:	100% PA
Weight:	78 g/m²

BENEFITS:

- Extremely breathable, reduced sweat accumulation (RET <4)
- Durably waterproof and windproof
- Specially developed for high energy activities in all weather conditions
- Improved softness and next-to-skin comfort
- Quieter and lighter

DYNA-SHELL

DYNA-SHELL 3 LAYER

- DYNA-SHELL 3 LAYER
- Water column: 20.000 mm
 - Breathability: 20.000 g/m²/day
 - Windproof
 - Nylon face fabric
 - Lightweight
 - Durably water repellent
 - Packable

DYNA-SHELL 2.5 LAYER

- DYNA-SHELL 2.5 LAYER
- Water column: 20.000 mm
 - Breathability: 20.000 g/m²/day
 - Windproof
 - Nylon face fabric
 - Lightweight
 - Durably water repellent
 - Packable

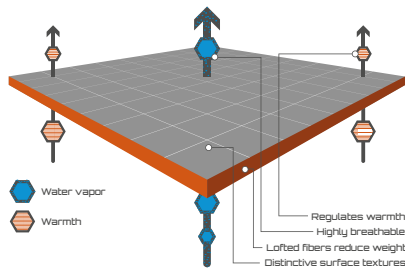

INSULATION & THERMALS

POLARTEC® ALPHA®

- Overheating is underperforming. POLARTEC® ALPHA® allows a free exchange of air to keep you warm, comfortable and focused.
- Breathable to provide comfort in all activities
 - Dries quickly to minimize heat loss
 - Insulates even when wet
 - Versatile; appropriate for a broad range of activities as a mid- or outer-layer
 - Wind resistant
 - Machine washable

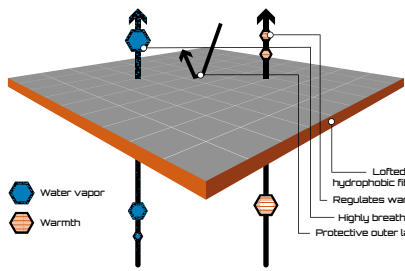

Composition: 100% PES
Weight: 60 g/m² and 100 g/m²

POLARTEC® POWER GRID

Polartec® Power Grid™ fabrics are designed to keep your skin dry when you sweat featuring a bi-component knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly. These fabrics weigh less, take up less pack space, and deliver more insulation and breathability than most fabrics in their class.

Composition: 100% PES
Weight: 224 g/m²
Pilling Resistance: 4
Snagging Resistance: 4

DYNA-FILL

DYNA-FILL insulation replicates the structure of down in a lightweight continuous synthetic insulation filament, offering warmth, packability, look & feel of down but with the advantage of synthetic insulation to keep you warm even when wet.

TECHNICAL FABRICS & FABRIC TREATMENTS

DYNA-SHELL

DYNA-SHELL ULTRALIGHT

- Microdenier woven nylon
- Ultra lightweight
- Wind resistant
- Highly breathable
- Soft handfeel
- Durably water repellent
- Packable

DYNA-SHELL STRETCH

- Stretch woven nylon
- High abrasion resistance
- Wind resistant
- 100% breathable
- Softshell handfeel
- Durably waterrepellent
- High air permeability

DRYARN

Dryarn® is an innovative microfiber, which is the lightest in the natural world, which is water-repellent, breathable as well as bacteriostatic.

LIGHTNESS:

Dryarn® is super light – meaning that the fiber weights 32% less than wool and 34% less than Polyester.

THERMAL COMFORT:

Dryarn® offers excellent moisture transport to support a healthy microclimate on the skin. Sweat is immediately transported to the outside, so your body stays dry and warm in every conditions.

DRY SKIN:

Dryarn® is extremely breathable, evaporating sweat to the outside and preventing that the fabric gets soaked. Thus the body stays warm during normal and exhausting activities.

DRIRELEASE®

A patented performance sports material that has the look and feel of classic cotton, but keeps you dry, cool, comfortable and fresh.

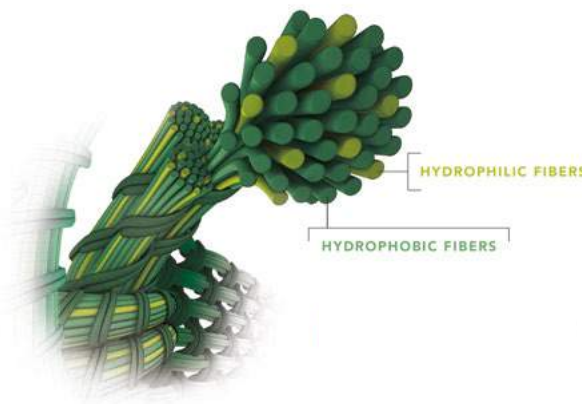

PATENTED FOR PERFORMANCE

drirelease fabrics offer a patented blend of 85-90% synthetic, hydrophobic (water repelling) fibers and 10-15% natural, hydrophilic (water absorbing) fibers. The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly. That's why clothing made with DR always feels soft and stays dry.

BACTERIOSTATIC:

Dryarn® is a naturally bacteriostatic fiber, it reduces the risk of irritation, allergies and rashes, as well as reducing odors.

- High thermo-insulating capacity
- Excellent moisture transport to support a healthy microclimate on the skin, both for summer and winter seasons
- Extremely lightweight, colorfast and durable
- A naturally “bacteriostatic” fibre, it reduces the risk of irritation, allergies and rashes, as well as reducing odors

CARVICO

Carvico are Italian engineered stretch fabrics created for high performance athletic apparel. They can correctly sustain muscles, increasing efficiency of movement and reducing muscle fatigue.

- 4 Way stretch
- Quick drying
- Extremely high pilling and abrasion resistance

ELASTIC INTERFACE®

Elastic interface® is an Italy based specialist for performance cycling pads. Their lightweight cycling pads are engineered to maximize freedom of movement, saddle stability and protection, to avoid any discomfort, inconvenience and pain. Their MTB Performance 3 cycling pad used in our products was specifically designed to meet the requirements of long distance mountain biking. 100% of their production is located in Italy.

Polygiene
STAY FRESH

POLYGIENE®

Polygiene is a permanent odor control garment treatment. It prevents the growth of odor-causing bacteria and fungi at the source. A low concentration of silver salt which has antimicrobial properties is integrated in the fabric. It is not nanosilver and is only active on the textiles itself. The treatment is bluesign® approved which means it meets rigorous independent environmental and product life cycle standards.

S-TECH

Thanks to the seamless S-Tech construction, the elastic material adapts perfectly to the body. This provides increased freedom of movement, improved moisture management and an increased level of comfort.

APPAREL

PACKABLE
Product packs small.

BREATHABLE
Breathable performance fabric.

WIND PROOF
Performance fabric with a windproof membrane.

WIND RESISTANT
A tightly woven fabric keeps out most wind and at the same time enables good ventilation.

WATER PROOF
Performance fabric with a waterproof membrane and sealed seams.

WATER REPELLANT
Performance fabric with water repellency.

4-WAY-STRETCH
Performance fabric with 4-way stretch for great freedom of movement.

EXPANDABLE BACK
When opened, the zipper on the back allows carrying a pack under the jacket.

VENTILATION
Laser-perforated openings under the arm or on the back increase ventilation.

QUICK DRY
Extra quick-drying performance fabric.

EQUIPMENT

SPEED POLE FIXATION
Pole attachments on the side of a pack. Poles tips are placed in a special pocket and lashed onto the pack using an elastic cord.

POLE FIXATION
Performance fabric with a waterproof membrane and sealed seams.

COMPRESSION STRAP
Pulling on a strap to tighten it compresses the pack to a minimum volume, depending on contents.

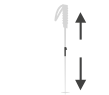

SAFETY BOX
An easily accessible pocket with hook-and-loop closures on the bottom of the pack allows access to pack contents without needing to take it off.

HELMET ATTACHMENT
Helmet holder with light stretch, on the underside of the pack for simple retrieval and stowing.

WIND SHIELD
An integrated wind shield in the upper left pocket on the shoulder strap can be used if needed to protect the upper body from wind.

ADJUSTABLE POLE LENGTH
Poles are variable in length and can be adjusted from 115 to 135 cm, depending on the use and user height.

FOOTWEAR

ALPINE ROCKER
The rocker midsole has a rocker shape that results in fluid and dynamic heel-to-toe running motion.

INVISIBLE LACING
Stretch fabric lace cover to protect laces from wear-and-tear and to keep out debris such as leaves and stones.

POMOCA GLIDING PATH
A special S-shaped tread pattern – the “gliding path” – facilitates a natural roll-through of the foot, ensures a seamless push-off, and reduces elastic deformation for better shape retention. A traction zone alongside the gliding path offers good footing on varying terrain.

VIBRAM LUGS
Special design of Vibram Lugs - lugs adapt individually to the ground for better traction.

DNA VOLUME REDUCER
DNA FEATURE: spare insole that reduces the volume of the shoe - for a slimmer and tighter race fit.

DYNASHELL GAITOR
waterproof gaitor that protects feet from rocks, snow and mud.

ADAPTIVE TONGUE/FIT SYSTEM
3 layer construction made with parachute material - wraps foot and adapts fit while running - added on top of the seamless tongue.

SEAMLESS TONGUE
seamless tongue construction to eliminate chafing and reduce weight.

MAXIMUM CUSHIONING
Maximum cushioning for maximum running comfort.

CSR

PFC-FREE
PFC free durable water repellent finishing.

MADE WITH RECYCLED CONTENT
Styles containing at least 50% recycled content in their main fabric.

MADE IN EUROPE
Produced in Europe.

B2B PORTAL

DYNAFIT AT YOUR FINGERTIPS

Our B2B portal is an online shop for business customers. In comparison to email or faxed orders, the platform offers an overview of real-time availability because the system is connected to our inventory management system and is updated daily. Every retailer who has been given access by us can place orders around the clock and can download marketing materials such as images, videos, workbooks, and much more. Website: serviceportal.oberalp.biz

WHY YOU SHOULD USE OUR B2B PORTAL

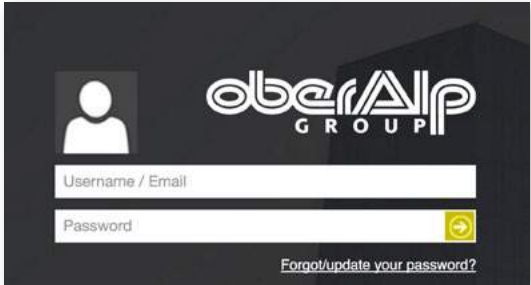

- Ability to order any time of the day or night, regardless of our office hours
- Deliveries FOB without any minimums
- Simple overview of available sizes and colours
- Easy, timely, and quick processing – without the need to hold on a call
- Opportunity to print or electronically archive all orders
- Downloading of images, product descriptions, price lists, catalogues (PDF format), and videos
- Ability to track shipments of orders placed
- Overview of all orders, whether placed on the B2B portal or elsewhere

HOW TO REGISTER FOR THE B2B PORTAL

1 Open a web browser to our home page dynafit.com. In the footer area, on the right side, select “B2B / PRESS PORTAL”, or input the web address serviceportal.oberalp.biz into your browser.

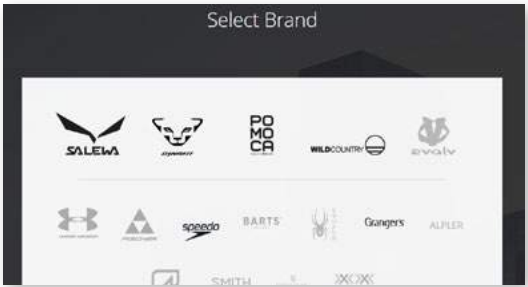

2 Fill out the new customer registration form with all the necessary information. Within 24 hours, you will receive your login details for access.

3

At serviceportal.oberalp.biz, a dialogue box will appear to request your login details. Input your user name and password. Click on “Log in”.

4

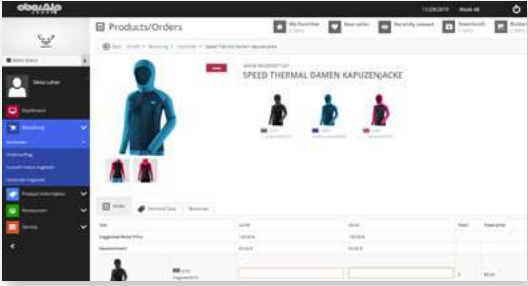

In the B2B portal, we offer all products of the OBERALP Group available for each country. First, choose the collection from which you want to order by clicking on the brand. You can select any collection for which you have access.

5

You are able to search for products by clicking on “Order” in the “Products/Orders” section and then inputting the product name (a part of the name is usually sufficient) or the product number. Click on “Search” to show all relevant search results.

6

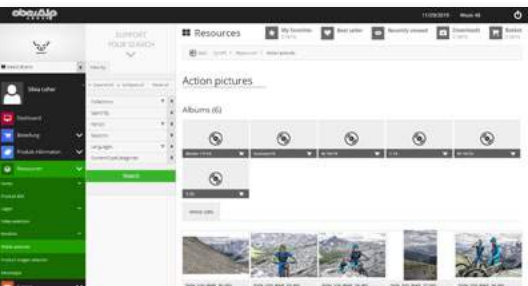

Click on an article and then you will see in the next overview whether the article is available in the different colors. When the box is bordered in green, the product has immediate availability and there are usually at least 10 pieces in stock. If the quantity in stock is less than 10, the box is bordered in orange. If the product is not available immediately but will be available for shipping in the next four weeks or less, a small “i” is visible in each box with the estimated week of delivery. If a specific size is not shown, it is no longer available. Simply input your desired quantity in the box, and then click on “Add to my cart”.

7

Repeat steps 5 and 6 for each article you would like to order. Your orders will be placed in your cart. To finalise your order, click on your card and select “Place my order”. After inputting a delivery address,

if it is different, click on “Confirm order” to complete the transaction. You will receive an order summary by email.

8

You can also download product images, action shots, workbooks, logos, videos, and our Service Guide. For any of those, just click on the left menu area on “Resources” and open the desired menu item. There, you can download a wide variety of materials.

9

Afterward, you can look at your order again, print it out, or download the associated product images for your order. Click here on “Service” and “Order”. Here, you see all of your orders. Clicking on “Download” allows you to download your order sheet or the associated product images.
