

DYNAFIT

SUMMER 2021

**TRAIL RUNNING
ATHLETIC MOUNTAINEERING**

CONTENT

All paper of this DYNAFIT Workbook comes from 100 % reclaimed or re-used material.
FSC® helps take care of forests and the people and wildlife that call them home.

For the printing of this workbook only mineral oil-free ecological printing inks were used, which are 100 % degradable.

We offset CO₂ emissions of our workbooks with certified climate-protection projects. To that end, all CO₂ emission sources are measured. That includes paper pulp, paper production, as well as printing plates and ink that are used for printing. CO₂ emissions that are created in printing are offset by certified climate-protection projects in other areas. Every order entered has an individual tracking number that is integrated into the upper logo. With this ID, the climate neutrality of the printed product from the point of ordering to the offset with CO₂ can be traced.

GRIP P – POMOCA

GRIP

VIBRAM® MEGAGRIP

The new high-performance rubber compound featuring unparalleled grip on wet and dry surfaces, rugged longevity and optimal ground adaptability.

POMOCA –
70 YEARS OF SOLE MAKING HISTORY

The newly developed rubber compound and outsole construction provide optimum traction for a smooth, energy-efficient gait. Its biomechanical design promotes a natural motion of the foot and prevents dirt and rocks from lodging in the tread and sticking to lugs.

FIT

DNA (SUPER MINIMAL VOLUME)

Full control and sensitivity. Tight and precise like a glove to perform at a high level. Very low shoe volume.

MINIMAL VOLUME

Precise fit which allows a proper control and support. Low shoe volume.

MEDIUM VOLUME

Wrapping effect but without any constraints in order to keep a high versatility of usage. Medium shoe volume.

MAXIMUM VOLUME

Stability and comfort. More space for a proper blood circulation on longer distances. Maximum shoe volume.

FEATURES OF ALL DYNAFIT SHOES

BALLISTIC BUMPER

This reduces the effect of impacts at the toes and forefoot while at the same time improving the durability of the shoe.

HEEL PRELOADER

The heel preloader construction ensures comfort and precision support. Diagonal reinforcements at the heel support the foot during the running gait and improve fit in the heel area.

TRAIL RUNNING

En el Trail Running correrás por montaña, por territorio alpino y en pistas de montaña. Los atletas de Trail Running superan kilómetros por duras pendientes, distancias de ultrafondo y pistas con raíces entrecruzadas, barro y gravilla, y todos tienen algo en común: la rapidez y la facilidad con las que se mueven en montaña. Por supuesto, esto plantea unos retos claros a los materiales, que deben ser inteligentes, ligeros, con corte atlético, robustos, resistentes y con protección para el atleta. En pocas palabras: los trail runners buscan productos con una excelente relación peso-rendimiento y que puedan utilizar en cualquier terreno.

ATHLETIC MOUNTAINEERING

La evolución del alpinismo: una nueva categoría entre el Trail Running y el montañismo. Los atletas de Athletic Mountaineering conquistan cumbres con dinamismo, moviéndose con facilidad y velocidad. Pueden enfrentarse a picos de 3000m, superar varias cumbres en un solo día o atravesar cordilleras en travesías de varios días. Sea cual sea su reto, siempre lo hacen apostando por la agilidad y la velocidad. Las condiciones son siempre cambiantes, como también lo es el terreno, lo que plantea unos retos muy exigentes a los materiales utilizados en su equipo. Necesitan productos que ocupen y pesen muy poco, con un rendimiento máximo y que sean muy versátiles, ofreciendo siempre, por supuesto, una protección máxima a los deportistas. En pocas palabras: productos que reúnan comodidad, flexibilidad y ligereza.

BIKE

La combinación de distintos deportes de montaña se ha establecido como una nueva variante del alpinismo. Para los deportistas modernos de disciplinas de resistencia en montaña, las fronteras entre las categorías individuales se desdibujan cada vez más. Las distintas disciplinas como Trail Running, escalada, ciclismo de montaña o esquí de montaña se vuelven flexibles dependiendo de los gustos del usuario y acaban conectadas en una gran aventura de montaña. También se puede prescindir del vehículo para estar en armonía con la naturaleza y alargar así la ruta unos kilómetros más. Con la bicicleta de montaña, el entrenamiento suele empezar directamente en la puerta de

casa, recorriendo pastos, prados y bosques en una dinámica carrera cuesta arriba antes de los últimos metros para alcanzar la cima por terrenos pedregosos que requieren conocimientos técnicos. Para estos deportistas de montaña modernos y atléticos, DYNAFIT ha desarrollado una colección de bicicletas estudiadas a nivel técnico, con tantas facetas como los propios deportistas. Ligeras y con un volumen mínimo, de uso flexible y, a la vez, muy cómodas para los distintos perfiles de movimiento.

Bicicleta + X: esta es la nueva generación de Athletic Mountaineering.

ESSENTIALS

¡Exprime tus días de descanso! No hay nada que más nos guste que la montaña y estar activos. Nos recarga las pilas. Pero, a veces, necesitamos un descanso, el tiempo no lo permite o, simplemente, queremos dar una vuelta por la ciudad. Pero estar lejos de la montaña no significa renunciar a un estilo de vida activo. La colección 24/7 reúne productos con estilo y prácticos para cualquier momento en un entorno urbano y refleja nuestra pasión por el deporte y el aire libre. Urbana. Técnica. Ligera.

TIGHT FIT

- Made of stretch/elastic fabrics
- Fit next to the skin

These close fitting garments optimize the moisture management and thermal efficiency.

ATHLETIC FIT

- Anatomic shape
- Freedom of movement
- Lower volume for reduced bulk

These closer-fitting pieces layer well under other garments.

SPORTIVE FIT

- Anatomic shape
- Maximum range of motion

Easy layering under these relaxed fitting items extends seasonal versatility and comfort.

CORPORATE
SOCIAL
RESPONSIBILITY

We see it as our duty to equip passionate mountain sport athletes with innovative, premium products for unforgettable experiences in the outdoors. In doing so, it is a given for us to also assume responsibility – certainly for the safety of the athletes, but also for protecting our environment and fellow human beings.

Corporate responsibility comprises not only sustainable business practices along the entire value chain but also equally transparent communication with all relevant stakeholders in order to continually learn and improve.

ENSURING OUR MATERIALS
AND PRODUCTS ARE SAFE
FOR BOTH HUMANS AND ANIMALS,
AND FOR THE ENVIRONMENT
IS OUR TOP PRIORITY.

FAIR WORKING CONDITIONS

The largest portion of our apparel is produced in Asia. The global centre of competence plus cutting and sewing expertise is currently located there, including some of the most efficient production partners. This means some of our factories are far away from us, making it harder for us to monitor each step of the process. Achieving fair working conditions in these factories means we have to pick the best partners and work with them to help them reach our high standards for working conditions.

All our suppliers have to sign and commit to our Code of Conduct, a document that sets the social and ethical standards to be respected in all facilities manufacturing our products.

FAIR WEAR FOUNDATION

To ensure we are always putting the well-being of our associates first, we also partner with the most rigorous labour conditions expert in textiles that we know: Fair Wear Foundation. Fair Wear Foundation is an independent non-profit organisation with the mission to improve working conditions globally in the textile and apparel industries. We have been working with Fair Wear Foundation since 2013 to ensure the well-being of workers involved in the manufacturing of our textile products. FWF helps us monitor working conditions and audit our factories, it supports us in our relations with our suppliers, and it ensures we are subject to an annual review. In 2017, FWF assigned us the leader status – a level only given to brands who are doing exceptionally well and operating at an advanced level. FWF raises the bar with its requirements every year, and we're continually being challenged to do more to satisfy these increased standards. We're proud to say that we were again among "the leaders" in 2018 and 2019. This tells us we are on the right path!

Currently, 98% of our textile production is under monitoring for fair working conditions (the factories have either been audited by third party experts in workers' rights or are located in low-risk countries such as Italy and Germany).

Find out more about Fair Wear Foundation at fairwear.org.

MADE IN EUROPE

As an innovator and developer of technical equipment and gear for mountain sports, it remains our biggest challenge to work sustainably. Social responsibility for people and nature is a given.

Fair working conditions, high quality standards, shorter transport distances – all of this saves resources and is our highest priority in our search for appropriate production facilities in Europe.

We are working constantly on shifting more production facilities to Europe. When it comes to bindings and ski touring boots, 100% of production occurs in Europe; textiles are still in large part imported from Asia. However, we pay special attention here to ensure safe and fair working conditions in all our factories.

For more information on our sustainability work, read our latest sustainability report at dynafit.com/sustainability.

PRODUCTION SITE	VALUE % (FOB)
* Germany	29,9%
* Italy	27,2%
Vietnam	15,8%
China	9,1%
Bangladesh	8,0%
* Austria	3,7%
* Lithuania	2,3%
Cambodia	1,4%
* France	0,5%
* Switzerland	0,5%
Tunisia	0,2%
* Moldova	0,4%
Taiwan	0,4%
Turkey	0,2%
Hong Kong	0,1%

HIGHER CHEMICAL STANDARDS

One of our priorities is making top performance products that are safe for both humans and the environment. Our goal is to control the entire lifecycle of our products – from raw material, through the production process, to the finished product. Our products are manufactured according to the Oberalp Chemical Policy. The document establishes a formal process to ban or limit the presence and use of hazardous substances in our products and production processes. This guarantees safety and compliance. However, we decided to go one step further, and our chemical policy is even stricter than the legal limits we must comply with. The policy includes a long list of chemicals that are excluded or limited from all our products (Restricted Substances List, RSL). All DYNAFIT products have to abide by the policy. It's a central part of the Conditions of Purchase with our suppliers, and it's mandatory at every stage of the production and distribution process.

We conduct chemical tests on our products to ensure they meet our high standards and we also work with expert partners and third-party certifications, such as bluesign®. We have been bluesign® system partners since 2011 and today a large portion of the fabrics used in our products are certified. bluesign® seeks to eliminate hazardous substances starting at the first stage of the manufacturing process and guarantees a safe and clean supply chain for the environment and for everyone involved at every step. We also work with an external and independent chemical laboratory to conduct tests on our products every season to ensure they are meeting our strict internal standards.

PFC-FREE DURABLE WATER REPELLENTS (DWR)

Perfluorocarbons (PFCs) are a type of chemical used to make products resistant to water, grease and stains. PFCs guarantee best-in-class performance for our technical apparel that needs to be both water-repellent and still allow humidity to exit. The problem with PFCs is that they are linked to negative health effects in humans, animals and nature. Both during the production and use phases, PFCs are released into the environment and are persistent. This means they degrade very slowly in nature and can also travel easily through water and wind. They then end up in our food chain. For this reason, since 2014 we have completely eliminated long-chain PFCs (C8) from all our products. All our water-repellent (DWR) products now either contain shorter-chain PFCs (C6) or are 100% PFC-free. We have started to increase the number of PFC-free repellency treatments in our products.

For our most technical products to be used in extreme weather conditions, it is necessary to apply C6 DWR treatment to ensure full weather protection and warmth. We are continuously investing to further reduce the use of C6-chemicals in our fabrics and significantly increase the number of PFC-free products without compromising on user-safety performance. Please note that contamination from PFCs cannot be excluded.

SUSTAINABLE COLLECTION
VERT SHIRT made from
100% recycled content:
breathable, light, sustainable.

MADE WITH RECYCLED CONTENT

The styles marked with "made with recycled content" contain at least 50% recycled content in their main fabric. The recycled polyester used in our collection is mostly made from post-consumer PET bottles. Existing plastic is melted down and spun into new polyester fiber, also known as rPET. The production of one of our 100% recycled polyester shirts is made with an average of 7 PET bottles. This means we reduce our dependence on petroleum and we use "waste" as the raw material. By using post-consumer recycled plastic to create our recycled fibers, we are also diverting plastic from ending up in landfills. Our supplier estimates that the production of recycled polyester saves more than 50% of energy and CO₂ emissions compared to virgin polyester, reducing the overall environmental impact of the product. Most of the shirts made of polyester are also recyclable, meaning their fabric can be fed back into the production cycle.

MATERIAL GLOSSARY

BREATHABILITY

Breathable material is permeable to water vapor, thus able to transfer moisture from the inside out. Breathability is measured with RET and MTRV values. The RET (resistance-evaporation-transmission) value indicates the water vapor resistance of a fabric. The lower the resistance, the more breathable the material. (e.g.: RET < 3 = highly breathable and RET > 20 = non-breathable). The MTRV (moisture-revapor-transmission rate) value is another criterium adapted to measure breathability: A lab test can calculate the amount of water vapor that can cross one square meter of fabric in 24 hours. The greater this amount, the more breathable the material. A MTRV value of > 10,000 is considered a good level of breathability.

AIR PERMEABILITY VALUE

Measures the wind resistance of a fabric: Values of <5 mm/s are considered good. Fabrics with windproof membranes have an air permeability value of 0 mm/sec.

WATER COLUMN

Water column is a pressure measurement. A water column of 20,000 mm indicates that the laminate fabric lets water through at a pressure of 20,000 mm.

ABRASION/SNAGGING RESISTANCE

Established by the Martindale test: The fabric is rubbed against wool in a circular motion; the level of resistance is determined by the number of times the operation can be repeated before the fabric tears.

PILLING RESISTANCE

Indicated with values from 1 (severe pilling) to 2–4 (moderate pilling) to 5 (very slight pilling). Tested with the Martindale method – the fabric sample is rubbed against itself and compared with standard results after 2,000 cycles.

MATERIAL SHORTCUTS

PA	Polyamid
PP	Polypropylen
CO	Cotton
EL/EA	Elasthan
PE	Polyehtylen
PES/PE	Polyester
PTFE	Polytetrafluorethylen

GORE-TEX® ACTIVE® WITH SHAKEDRY™ PRODUCT TECHNOLOGY

Through this technology the face fabric could be eliminated and a unique beading surface is created. This means no wetted out face fabric and constant water repellency and thus no additional weight pick-up. As the name says the garments shake dry.

Breathability:	RET < 3 (Training) resp. RET < 3 (Hiking)
Water Column:	23.000 mm

COMPOSITION:

Shell:	100% ePTFE
Backing:	100% PA
Weight:	49 g/m² (Training) resp. 78g/m² (Hiking)

GORE-TEX PACLITE® PLUS PRODUCT TECHNOLOGY

Hope for the best, prepare for the worst. Being serious about your mountaineering adventure means carrying a back-up shell that's exceptionally packable und lightweight, very breathable, and protects you with the GUARANTEED TO KEEP YOU DRY™ promise. Proven to be abrasion resistant and very durable, with GORE-TEX® PALITE Plus garments you are ready for unexpected adventure.

Breathability:	RET < 9
Water Column:	28.000 mm

COMPOSITION:

Face Fabric:	100% PA
Membrane:	100% ePTFE
Backing:	100% PA
Weight:	74 g/m²

SHELLS & SOFTSHELLS

GORE-TEX® SHELLS

GORE-TEX® fabrics lead the way in waterproof protection, breathability and durability for technical outdoor apparel.

GORE-TEX® ACTIVE PRODUCT TECHNOLOGY

Garments made with the newest generation of the GORE-TEX® Active 3-layer product technology are lightweight, soft, quiet and extremely breathable. They deliver the waterproof and windproof performance of a hard shell with the pleasant touch and next to skin comfort of a soft shell.

Breathability:	RET < 3,5
Water Column:	23.000 mm

COMPOSITION:

Shell:	100% PA
Backing:	100% PA
Weight:	78 g/m²

BENEFITS:

- Extremely breathable, reduced sweat accumulation (RET <4)
- Durably waterproof and windproof
- Specially developed for high energy activities in all weather conditions
- Improved softness and next-to-skin comfort
- Quieter and lighter

DYNA-SHELL

DYNA-SHELL 3 LAYER

- DYNA-SHELL 3 LAYER
- Water column: 20.000 mm
 - Breathability: 20.000 g/m²/day
 - Windproof
 - Nylon face fabric
 - Lightweight
 - Durably water repellent
 - Packable

DYNA-SHELL 2.5 LAYER

- DYNA-SHELL 2.5 LAYER
- Water column: 20.000 mm
 - Breathability: 20.000 g/m²/day
 - Windproof
 - Nylon face fabric
 - Lightweight
 - Durably water repellent
 - Packable

INSULATION & THERMALS

POLARTEC® ALPHA®

- Overheating is underperforming. POLARTEC® ALPHA® allows a free exchange of air to keep you warm, comfortable and focused.
- Breathable to provide comfort in all activities
 - Dries quickly to minimize heat loss
 - Insulates even when wet
 - Versatile; appropriate for a broad range of activities as a mid- or outer-layer
 - Wind resistant
 - Machine washable

Composition: 100% PES
Weight: 60 g/m² and 100 g/m²

POLARTEC® POWER GRID

Polartec® Power Grid™ fabrics are designed to keep your skin dry when you sweat featuring a bi-component knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly. These fabrics weigh less, take up less pack space, and deliver more insulation and breathability than most fabrics in their class.

Composition: 100% PES
Weight: 224 g/m²
Pilling Resistance: 4
Snagging Resistance: 4

DYNA-FILL

DYNA-FILL insulation replicates the structure of down in a lightweight continuous synthetic insulation filament, offering warmth, packability, look & feel of down but with the advantage of synthetic insulation to keep you warm even when wet.

TECHNICAL FABRICS & FABRIC TREATMENTS

DYNA-SHELL

DYNA-SHELL ULTRALIGHT

- Microdenier woven nylon
- Ultra lightweight
- Wind resistant
- Highly breathable
- Soft handfeel
- Durably water repellent
- Packable

DYNA-SHELL STRETCH

- Stretch woven nylon
- High abrasion resistance
- Wind resistant
- 100% breathable
- Softshell handfeel
- Durably waterrepellent
- High air permeability

DRYARN

Dryarn® is an innovative microfiber, which is the lightest in the natural world, which is water-repellent, breathable as well as bacteriostatic.

LIGHTNESS:

Dryarn® is super light – meaning that the fiber weights 32% less than wool and 34% less than Polyester.

THERMAL COMFORT:

Dryarn® offers excellent moisture transport to support a healthy microclimate on the skin. Sweat is immediately transported to the outside, so your body stays dry and warm in every conditions.

DRY SKIN:

Dryarn® is extremely breathable, evaporating sweat to the outside and preventing that the fabric gets soaked. Thus the body stays warm during normal and exhausting activities.

DRIRELEASE®

A patented performance sports material that has the look and feel of classic cotton, but keeps you dry, cool, comfortable and fresh.

PATENTED FOR PERFORMANCE

drirelease fabrics offer a patented blend of 85-90% synthetic, hydrophobic (water repelling) fibers and 10-15% natural, hydrophilic (water absorbing) fibers. The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly. That's why clothing made with DR always feels soft and stays dry.

BACTERIOSTATIC:

Dryarn® is a naturally bacteriostatic fiber, it reduces the risk of irritation, allergies and rashes, as well as reducing odors.

- High thermo-insulating capacity
- Excellent moisture transport to support a healthy microclimate on the skin, both for summer and winter seasons
- Extremely lightweight, colorfast and durable
- A naturally “bacteriostatic” fibre, it reduces the risk of irritation, allergies and rashes, as well as reducing odors

CARVICO

Carvico are Italian engineered stretch fabrics created for high performance athletic apparel. They can correctly sustain muscles, increasing efficiency of movement and reducing muscle fatigue.

- 4 Way stretch
- Quick drying
- Extremely high pilling and abrasion resistance

ELASTIC INTERFACE®

Elastic interface® is an Italy based specialist for performance cycling pads. Their lightweight cycling pads are engineered to maximize freedom of movement, saddle stability and protection, to avoid any discomfort, inconvenience and pain. Their MTB Performance 3 cycling pad used in our products was specifically designed to meet the requirements of long distance mountain biking. 100% of their production is located in Italy.

POLYGIENE®

Polygiene is a permanent odor control garment treatment. It prevents the growth of odor-causing bacteria and fungi at the source. A low concentration of silver salt which has antimicrobial properties is integrated in the fabric. It is not nanosilver and is only active on the textiles itself. The treatment is bluesign® approved which means it meets rigorous independent environmental and product life cycle standards.

S-TECH

Thanks to the seamless S-Tech construction, the elastic material adapts perfectly to the body. This provides increased freedom of movement, improved moisture management and an increased level of comfort.

APPAREL

PACKABLE
Producto plegable compacto.

BREATHABLE
Material funcional transpirable.

WIND PROOF
Material funcional con membrana cortavientos.

WIND RESISTANT
Un diseño minucioso del material que mantiene el viento alejado del cuerpo y permite a la vez una buena circulación del aire.

WATER PROOF
Material funcional con membrana impermeable y costuras selladas.

WATER REPELLANT
Material funcional impermeable.

4-WAY-STRETCH
Material funcional con elasticidad en 4 direcciones para una mayor libertad de movimiento.

EXPANDABLE BACK
La cremallera en la espalda permite llevar la mochila bajo la chaqueta.

VENTILATION
Ventilación gracias a las aberturas perforadas con láser bajo los brazos o en la espalda.

QUICK DRY
Material funcional de secado ultrarrápido.

EQUIPMENT

SPEED POLE FIXATION
Fijación lateral para bastón en la mochila. Los bastones se introducen con la punta hacia delante en el bolsillo previsto para ello y se fijan con la ayuda de la cinta elástica.

POLE FIXATION
Los bastones se pueden sujetar en la parte posterior de la mochila o en el bolsillo con ayuda de cordones y cintas elásticas.

COMPRESSION STRAP
La mochila se puede comprimir mediante los cordones hasta un volumen mínimo, en función del contenido.

SAFETY BOX
Un bolsillo con cremallera fácilmente accesible en el fondo de la mochila permite el acceso al contenido sin tener que quitarse la mochila. Perfecto para, por ejemplo, crampones.

HELMET ATTACHMENT
Soporte ligero y elástico del casco en la parte inferior para facilitar su recogida y almacenamiento.

WIND SHIELD
El cortavientos integrado en el bolsillo superior izquierdo de la correa puede utilizarse en caso de necesidad para proteger del viento la parte superior del cuerpo.

ADJUSTABLE POLE LENGTH
La longitud de los bastones es variable y puede, dependiendo de su uso y estatura del usuario, medir entre 115 y 135 cm.

FOOTWEAR

ALPINE ROCKER
La entresuela Rocker hace que el talón y la puntera se doblan hacia arriba en la parte delantera del pie, lo que permite un movimiento fluido y dinámico del talón a los dedos al correr.

INVISIBLE LACING
Cordones elásticos para protegerlos del desgaste y evitar que entre suciedad, como hojas y piedras.

POMOCA GLIDING PATH
La estructura de los tacos en forma de S (el área de contacto) fomenta la pisada natural del pie, permite que la suela se deslice sin problemas y reduce la energía de deformación. Gracias a la estructura de los tacos, la zona de tracción situada junto a esta área de contacto garantiza una adherencia óptima sobre cualquier tipo de terreno.

VIBRAM LUGS
Diseño especial de los tacos Vibram, que se adaptan individualmente al terreno para mejorar la tracción.

DNA VOLUME REDUCER
Característica DNA: suela de repuesto que reduce el volumen de la zapatilla, para que sea más estilizada y ajustada.

DYNASHELL GAITOR
Polainas impermeables que protegen los pies de rocas, nieve y barro.

ADAPTIVE TONGUE/FIT SYSTEM
Cordones flexibles con estructura de tres capas, hechos con material de paracaídas, que envuelven el pie y se adaptan durante la carrera.

SEAMLESS TONGUE
Cordones sin costuras para evitar rozaduras.

MAXIMUM CUSHIONING
Máxima amortiguación para la máxima comodidad al correr.

B2B PORTAL

DYNAFIT AT YOUR FINGERTIPS

Our B2B portal is an online shop for business customers. In comparison to email or faxed orders, the platform offers an overview of real-time availability because the system is connected to our inventory management system and is updated daily. Every retailer who has been given access by us can place orders around the clock and can download marketing materials such as images, videos, workbooks, and much more. Website: serviceportal.oberalp.biz

WHY YOU SHOULD USE OUR B2B PORTAL

- Ability to order any time of the day or night, regardless of our office hours
- Deliveries FOB without any minimums
- Simple overview of available sizes and colours
- Easy, timely, and quick processing – without the need to hold on a call
- Opportunity to print or electronically archive all orders
- Downloading of images, product descriptions, price lists, catalogues (PDF format), and videos
- Ability to track shipments of orders placed
- Overview of all orders, whether placed on the B2B portal or elsewhere

HOW TO REGISTER FOR THE B2B PORTAL

1 Open a web browser to our home page dynafit.com. In the footer area, on the right side, select “B2B / PRESS PORTAL”, or input the web address serviceportal.oberalp.biz into your browser.

2 Fill out the new customer registration form with all the necessary information. Within 24 hours, you will receive your login details for access.

3

At serviceportal.oberalp.biz, a dialogue box will appear to request your login details. Input your user name and password. Click on “Log in”.

4

In the B2B portal, we offer all products of the OBERALP Group available for each country. First, choose the collection from which you want to order by clicking on the brand. You can select any collection for which you have access.

5

You are able to search for products by clicking on “Order” in the “Products/Orders” section and then inputting the product name (a part of the name is usually sufficient) or the product number. Click on “Search” to show all relevant search results.

6

Click on an article and then you will see in the next overview whether the article is available in the different colors. When the box is bordered in green, the product has immediate availability and there are usually at least 10 pieces in stock. If the quantity in stock is less than 10, the box is bordered in orange. If the product is not available immediately but will be available for shipping in the next four weeks or less, a small “i” is visible in each box with the estimated week of delivery. If a specific size is not shown, it is no longer available. Simply input your desired quantity in the box, and then click on “Add to my cart”.

7

Repeat steps 5 and 6 for each article you would like to order. Your orders will be placed in your cart. To finalise your order, click on your card and select “Place my order”. After inputting a delivery address, if it is different, click on “Confirm order” to complete the transaction. You will receive an order summary by email.

8

You can also download product images, action shots, workbooks, logos, videos, and our Service Guide. For any of those, just click on the left menu area on “Resources” and open the desired menu item. There, you can download a wide variety of materials.

9

Afterward, you can look at your order again, print it out, or download the associated product images for your order. Click here on “Service” and “Order”. Here, you see all of your orders. Clicking on “Download” allows you to download your order sheet or the associated product images.
