All paper of this DYNAFIT Workbook comes from 100 % reclaimed or re-used material.
FSC® helps take care of forests and the people and wildlife that call them home.

For the printing of this workbook only mineral oil-free ecological printing inks were used, which are 100 % degradable.

We offset CO_2 emissions of our workbooks with certified climate-protection projects. To that end, all CO_2 emission sources are measured. That includes paper pulp, paper production, as well as printing plates and ink that are used for printing. CO_2 emissions that are created in printing are offset by certified climate-protection projects in other areas. Every order entered has an individual tracking number that is integrated into the upper logo. With this ID, the climate neutrality of the printed product from the point of ordering to the offset with CO_2 can be traced.

POLARTEC® Alpha® DYNA-SHELL ULTRA LIGHT

08-0000071059

EXTREMELY LIGHTWEIGHT

PACKABLE WINDBREAKER SET FOR RACING AND TRAINING

Lightness, performance and technology: hardly any other style embodies the DYNAFIT values as thoroughly as the new DNA Windbreaker RACE Kit.

The ultra-light nylon fabric with PFC-free DWR treatment offers flexible weather protection during races and training – with jacket and pants weighing a little less than 120 g each. A specially designed long zipper on the back of the jacket enables ski mountaineers to quickly pull the jacket over the racing suit without having to take off the backpack. Due to the open-back construction, the backpack remains accessible at all times: skis can be attached and access to the crampons is ensured. Complying with ISMF regulation, the windbreakers should belong in the basic equipment of every ski touring racer.

DNA RACE WIND JACKET

Including a convenient stow pocket for exceptional reliability in unpredictable weather.

120 g

UNI 71502 – P. 24

DNA RACE WIND PANTS

When weather takes a turn on the mountain: Super lighweight pants with an ultra-comfortable fit.

120 g

UNI 71503 – P. 24

BACKPACK INTEGRATION

With the open back construction, the backback, skis and crampons remain accessible.

STOW AWAY SOLUTION

Both jacket and pants can be packed in the convenient stow pocket and easily strapped on.

RACE DNA WIND JACKET & PANTS

- COMPLYING WITH ISMF REGULATION
- STOW POCKET
- UNIQUE BACK CONSTRUCTION OF THE JACKET
- FULL SIDE ZIP ON PANTS
- SUPERLIGHT NYLON FABRIC: 100 % PA
- REFLECTIVE PRINT

SAVING PRECIOUS SECONDS

The pants can be put on or taken off within seconds thanks to two continuous zippers.

PFC FREE

DYNAFIT JACKET

The new SPEED Polartec® Hooded Jacket with the innovative Power Grid™ fabric is a prime example of our recycled content line.

POLARTEC® POWER GRID™ FABRIC

The surface on the inside of the jacket ensures quick moisture transport away from the body, while the outer surface is more robust and extremely quick-drying.

POLARTEC®

RECYCLING IN THE DYNAFIT COLLECTION

600.000
RECYLED BOTTLES
AROUND 30% ↓
REDUCTION OF CO_2 EMISSION IN THE YARN PRODUCTION

SPEED POLARTEC® HOODED JACKET

PER JACKET **20 BOTTLES**
91% RECYCLED **CONTENT**

I USED TO BE A BOTTLE

From plastic bottles to warm clothes: The new winter collection incorporates fleece jackets, insulation jackets, shirts and accessories made from recycled plastic.

The fabrics and synthetic insulation materials of the recycled content collection are mainly made from post-consumer recycled plastics: A total of 600,000 recycled PET bottles is processed into a number of products for the winter collection of 2021. Showing off the same material quality, the process of recycling plastics into yarn saves energy, reduces CO_2 emissions and makes us less dependent on raw materials. That is why it is our declared goal to increase the use of recycled materials for future collections.

The 37 styles that are marked with "made with recycled content" feature at least 50 % recycled content in the main fabrics. 40 additional styles contain fabrics and insulation materials with a significant proportion of recycled content. That is how performance and the sustainable use of resources go hand in hand.

BREATHABLE WEATHER PROTECTION

AN UPGRADE FOR ULTIMATE COMFORT

Perfect for ski touring: GORE-TEX INFINIUM™ – the high-performance material – completes the new DYNAFIT winter collection. 100 % windproof and highly water-repellent, the fabric provides solid weather protection while remaining extremely breathable.

The Radical INFINIUM™ hybrid outfit of the TOUR collection features the performance material in a hybrid construction: The 3-layer material provides protection from the elements for particularly exposed areas, while the innovative Dynastretch fabric offers additional breathability in areas where the body produces the most heat and sweat. The result: a perfectly balanced, athletic outfit that scores with all important ski touring features, climate comfort and weather protection for most winter days.

TOUR INFINIUM™ HYBRID OUTFIT

- HYBRID SOFTSHELL CONSTRUCTION
- WINDPROOF WEATHER PROTECTION
- HIGH LEVEL OF BREATHABILITY
- UNIQUE WATER REPELLENCY
- BRUSHED LINING
- ATHLETIC CUT

COMFORT AND PERFORMANCE GORE-TEX INFINIUM™ PRODUCTS

DYNASTRETCH™

GORE-TEX INFINIUM™ & DYNASTRETCH

The shoulder and chest area of the jacket and also large parts of the trousers are protected by the new GORE-TEX INFINIUM™ material (lime-colored on the jacket) – Dynastretch (dark blue) provides enhanced breathability for the back, under the arms and on the back of the knees.

RADICAL INFINIUM™ HYBRID JACKET

Weather protection through GORE-TEX INFINIUM™ plus highly breathable Dynastretch fabric - the perfect companion for extended ski tours.

GRIP (P) – POMOCA

GRIP

VIBRAM® MEGAGRIP

The new high-performance rubber compound featuring unparalleled grip on wet and dry surfaces, rugged longevity and optimal ground adaptability.

POMOCA – 70 YEARS OF SOLE MAKING HISTORY

The newly developed rubber compound and outsole construction provide optimum traction for a smooth, energy-efficient gait. Its biomechanical design promotes a natural motion of the foot and prevents dirt and rocks from lodging in the tread and sticking to lugs.

FIT

DNA (SUPER MINIMAL VOLUME)

Full control and sensitivity. Tight and precise like a glove to perform at a high level. Very low shoe volume.

MINIMAL VOLUME

Precise fit which allows a proper control and support. Low shoe volume.

MEDIUM VOLUME

Wrapping effect but without any constraints in order to keep a high versatility of usage. Medium shoe volume.

MAXIMUM VOLUME

Stability and comfort. More space for a proper blood circulation on longer distances. Maximum shoe volume.

FEATURES OF ALL DYNAFIT SHOES

TOE BUMPER

This reduces the effect of impacts at the toes and forefoot while at the same time improving the durability of the shoe.

HEEL PRELOADER

The heel preloader construction ensures comfort and precision support. Diagonal reinforcements at the heel support the foot during the running gait and improve fit in the heel area.

PROTECTION FOR ALL CONDITIONS

YOUR SUPPORT ON LONG RUNS

The Ultra 50 GTX is a Trail Running shoe with extra cushioning and a comfortable fit, offering more protection on long alpine trails. Thanks to its innovative GORE-TEX Invisible Fit membrane, the high-tech shoe features an additional waterproof barrier.

This well-cushioned Trail Running shoe was developed for all athletes striving for long-distance running in alpine terrain, even when it's wet outside. The maximum shoe volume combined with an excellent cushioned midsole and a grippy POMOCA outsole is the perfect recipe for support on long runs. With the "Invisible Lacing" system, a layer of elastic fabric was added for further increased protection against dirt and stones entering your shoes on the trail. A GORE-TEX membrane ensures that your feet are staying dry on long days in the mountains with changing and challenging conditions.

ESSENTIALS

Get the most out of your downdays! Spending active time in the mountains is our passion and source of energy. But sometimes our bodies need a break, conditions restrict us to go out or we just want to have a good day in the city. But being away from the mountains doesn't mean we can't live an active lifestyle. The 24/7 collection offers various stylish and functional products for each time of the day in an urban environment and reflects our passion for sports and outdoors.
Urban. Tech. Light.

DYNAFIT X MARIANNA TOMASELLI

"I HAVE ALWAYS BEEN FASCINATED BY THE MAJESTY AND SENSE OF MYSTERY THAT A MOUNTAIN HAS."

MARIANNA TOMASELLI | Milan

THE ART OF SPORTS

The unique 24/7 artist series, a cooperation of artist Marianna Tomaselli and DYNAFIT, focuses on the concept of three motives: the hike, the summit and the descent, all part of ski touring – an art form in itself. "The illustrations contain the sense of smallness that the human being has in front of the immensity of nature, the contemplation of the sense of infinity that nature can offer," Tomaselli explains.

Available in 6 colorways and featuring 3 different prints, the soft cotton shirts are made of 100 % organic cotton.

SIZE CHARTS

TIGHT FIT

- Made of stretch/elastic fabrics
- Fit next to the skin

These close fitting garments optimize the moisture management and thermal efficiency.

ATHLETIC FIT

- Anatomic shape
- Freedom of movement
- Lower volume for reduced bulk

These closer-fitting pieces layer well under other garments.

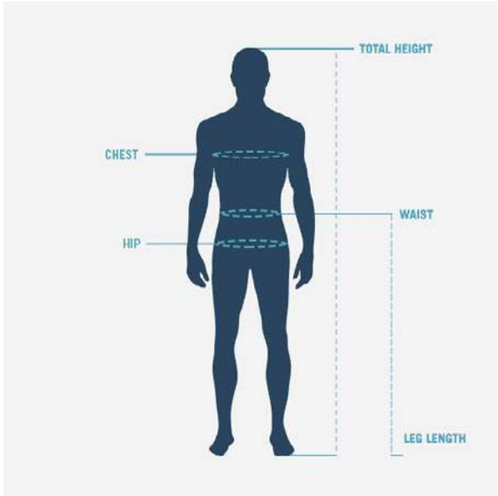

SPORTIVE FIT

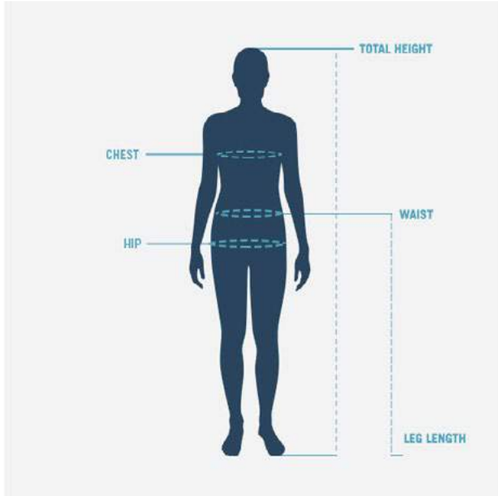

- Anatomic shape
- Maximum range of motion

Easy layering under these relaxed fitting items extends seasonal versatility and comfort.

CORPORATE SOCIAL RESPONSIBILITY

We see it as our duty to equip passionate mountain sport athletes with innovative, premium products for unforgettable experiences in the outdoors. In doing so, it is a given for us to also assume responsibility – certainly for the safety of the athletes, but also for protecting our environment and fellow human beings.

Corporate responsibility comprises not only sustainable business practices along the entire value chain but also equally transparent communication with all relevant stakeholders in order to continually learn and improve.

ENSURING OUR MATERIALS AND PRODUCTS ARE SAFE FOR BOTH HUMANS AND ANIMALS, AND FOR THE ENVIRONMENT IS OUR TOP PRIORITY.

FAIR WORKING CONDITIONS

The largest portion of our apparel is produced in Asia. The global centre of competence plus cutting and sewing expertise is currently located there, including some of the most efficient production partners. This means some of our factories are far away from us, making it harder for us to monitor each step of the process. Achieving fair working conditions in these factories means we have to pick the best partners and work with them to help them reach our high standards for working conditions.

All our suppliers have to sign and commit to our Code of Conduct, a document that sets the social and ethical standards to be respected in all facilities manufacturing our products.

FAIR WEAR FOUNDATION

To ensure we are always putting the well-being of our associates first, we also partner with the most rigorous labour conditions expert in textiles that we know: Fair Wear Foundation. Fair Wear Foundation is an independent non-profit organisation with the mission to improve working conditions globally in the textile and apparel industries. We have been working with Fair Wear Foundation since 2013 to ensure the well-being of workers involved in the manufacturing of our textile products. FWF helps us monitor working conditions and audit our factories, it supports us in our relations with our suppliers, and it ensures we are subject to an annual review. In 2017, FWF assigned us the leader status – a level only given to brands who are doing exceptionally well and operating at an advanced level. FWF raises the bar with its requirements every year, and we're continually being challenged to do more to satisfy these increased standards. We're proud to say that we were again among "the leaders" in 2018 and 2019. This tells us we are on the right path!

Currently, 98% of our textile production is under monitoring for fair working conditions (the factories have either been audited by third party experts in workers' rights or are located in low-risk countries such as Italy and Germany).

Find out more about Fair Wear Foundation at **fairwear.org**.

HIGHER CHEMICAL STANDARDS

One of our priorities is making top performance products that are safe for both humans and the environment. Our goal is to control the entire lifecycle of our products – from raw material, through the production process, to the finished product. Our products are manufactured according to the Oberalp Chemical Policy. The document establishes a formal process to ban or limit the presence and use of hazardous substances in our products and production processes. This guarantees safety and compliance. However, we decided to go one step further, and our chemical policy is even stricter than the legal limits we must comply with. The policy includes a long list of chemicals that are excluded or limited from all our products (Restricted Substances List, RSL). All DYNAFIT products have to abide by the policy. It's a central part of the Conditions of Purchase with our suppliers, and it's mandatory at every stage of the production and distribution process.

We conduct chemical tests on our products to ensure they meet our high standards and we also work with expert partners and third-party certifications, such as bluesign®.
We have been bluesign® system partners since 2011 and today a large portion of the fabrics used in our products are certified. bluesign® seeks to eliminate hazardous substances starting at the first stage of the manufacturing process and guarantees a safe and clean supply chain for the environment and for everyone involved at every step. We also work with an external and independent chemical laboratory to conduct tests on our products every season to ensure they are meeting our strict internal standards.

PFC-FREE DURABLE WATER REPELLENTS (DWR)

Perfluorocarbons (PFCs) are a type of chemical used to make products resistant to water, grease and stains. PFCs guarantee best-in-class performance for our technical apparel that needs to be both water-repellent and still allow humidity to exit. The problem with PFCs is that they are linked to negative health effects in humans, animals and nature. Both during the production and use phases, PFCs are released into the environment and are persistent. This means they degrade very slowly in nature and can also travel easily though water and wind. They then end up in our food chain. For this reason, since 2014 we have completely eliminated long-chain PFCs (C8) from all our products. All our water-repellent (DWR) products now either contain shorter-chain PFCs (C6) or are 100% PFC-free. We have started to increase the number of PFC-free repellency treatments in our products.

For our most technical products to be used in extreme weather conditions, it is necessary to apply C6 DWR treatment to ensure full weather protection and warmth. We are continuously investing to further reduce the use of C6-chemicals in our fabrics and significantly increase the number of PFC-free products without compromising on user-safety performance. Please note that contamination from PFCs cannot be excluded.

CORPORATE SOCIAL RESPONSIBILITY

MADE IN EUROPE

66% OF ALL DYNAFIT PRODUCTS ARE MANUFACTURED IN THE ALPS.

As an innovator and developer of technical equipment and gear for mountain sports, it remains our biggest challenge to work sustainably. Social responsibility for people and nature is a given.

Fair working conditions, high quality standards, shorter transport distances – all of this saves resources and is our highest priority in our search for appropriate production facilities in Europe.

We are working constantly on shifting more production facilities to Europe. When it comes to bindings and ski touring boots, 100% of production occurs in Europe; textiles are still in large part imported from Asia. However, we pay special attention here to ensure safe and fair working conditions in all our factories.

For more information on our sustainability work, read our latest sustainability report at **dynafit.com/sustainability**.

CRUELTY-FREE DOWN AND WOOL

We want to respect all living beings when making our products. Wool and down are the materials with animal origins that we use the most, and we take special care to ensure that the sheep, ducks and geese are treated humanely.

All our wool suppliers guarantee to avoid mulesing, a practice that causes the animals pain. Since autumn 2014, we're only using 100% Responsible Down Standard (RDS)-certified down in our apparel.
RDS is currently the most comprehensive animal welfare standard worldwide, guaranteeing that ducks and geese are treated well throughout their lives and all steps along the collector and industrial supply chains are checked and controlled. The standard is independent and is based on regular checks and inspections that are conducted without warning.
RDS-CERTIFIED DOWN MEANS:

- No live plucking
- No force-feeding of ducks and geese
- No slaughtering of animals only for down and feathers
- Yes to a fully audited supply chain by a professional, third-party certification body

MADE WITH RECYCLED CONTENT

The styles marked with "made with recycled content" contain at least 50% recycled content in their main fabric. The recycled polyester used in our collection is mostly made from post-consumer PET bottles. Existing plastic is melted down and spun into new polyester fiber, also known as rPET. This means we reduce our dependence on petroleum and we use "waste" as the raw material.

By using post-consumer recycled plastic to create our recycled fibers, we are also diverting plastic from ending up in landfills. Our supplier estimates that the production of recycled polyester saves more than 50% of energy and CO_2 emissions compared to virgin polyester, reducing the overall environmental impact of the product. Most of the shirts made of polyester are also recyclable, meaning their fabric can be fed back into the production cycle.

Recycled Content Highlight page 56

MATERIAL GLOSSARY

BREATHABILITY

Breathable material is permeable to water vapor, thus able to transfer moisture from the inside out. The breathability of materials can be measured with RET and MTVR values.

RET (RESISTANCE–EVAPORATION–TRANSMISSION)

The RET value indicates the water vapor resistance of a fabric. The lower the resistance, the more breathable the material (e.g. RET <3 = highly breathable and RET> 20 = non-breathable).

MVTR (MOISTURE–VAPOUR–TRANSMISSION RATE)

The MVTR is one way to express the breathability of fabrics. Laboratory tests measure the amount of water vapor that can pass through 1 m² of material in 24 hours. The higher the amount, the more breathable the material is. An MVTR of >10,000 is considered a good level of breathability.

WATER COLUMN

The water column is an indicator of the water permeability of a fabric or membrane. The height of the water column indicates the constant pressure of water at which the fabric starts leaking water. The higher the number, the better is the waterproofness. Most manufacturers consider fabrics as waterproof when the water column is higher than 10,000 mm.

ABRASION/SNAGGING RESISTANCE

Established by the Martindale test: The fabric is rubbed against wool in a circular motion; the level of resistance is determined by the number of times the operation can be repeated before the fabric tears.

PILLING RESISTANCE

Indicated with values from 1 (severe pilling) to 2–4 (moderate pilling) to 5 (very slight pilling). Tested with the Martindale method – the fabric sample is rubbed against itself and compared with standard results after 2,000 cycles.

MATERIAL SHORTCUTS

SHELLS

GORE-TEX® SHELLS

GORE-TEX garments lead the way in waterproof protection, breathability and durability for technical outdoor apparel.

BENEFITS:

· Durably waterproof
· Very breathable
· Totally windproof

GORE-TEX PERFORMANCE GARMENTS WITH C-KNIT BACKER

GORE-TEX garments with c-knit backer are durably waterproof, breathable and windproof. The technology improves comfort and performance using a patent pending laminate construction featuring a special knit backer. It reduces weight and improves breathability with feeling soft to the touch, particularly next to skin.

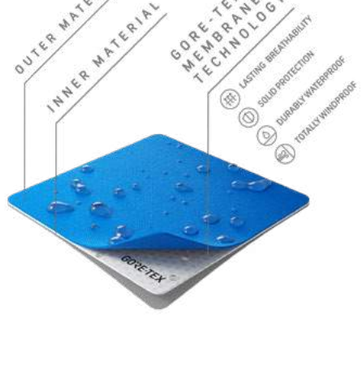

Water column: 28.000 mm
Breathability: RET <4,5

COMPOSITION:

Shell: 100% PA
Membrane: 100% ePTFE
Backing: 100% PA
Weight: 110 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Solid protection

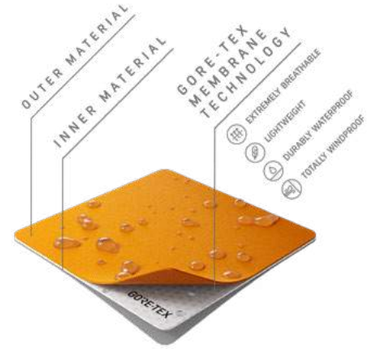

GORE-TEX ACTIVE GARMENTS

Garments made with the newest generation of GORE-TEX active 3-layer product technology are lightweight, quiet and extremely breathable, being specially developed for high energy activities in all weather conditions. They deliver the waterproof and windproof performance of a hard shell with the pleasant touch and next to skin comfort of a soft shell.

Water Column: 23.000 mm
Breathability: RET < 3,5
Weight: 78 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Extremely breathable
- Lightweight

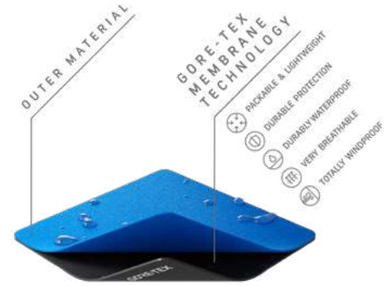

GORE-TEX PACLITE® PLUS GARMENTS

Hope for the best, prepare for the worst. Being serious about your mountaineering adventure means carrying a back-up shell that's exceptionally packable und lightweight, very breathable, and protects you with the GUARANTEED TO KEEP YOU DRY™ promise. Proven to be abrasion resistant and very durable, with GORE-TEX PACLITE® PLUS garments you are ready for unexpected adventures.

Water Column: 28.000 mm
Breathability: RET < 9
Weight: 74 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Packable & lightweight
- Durable protection

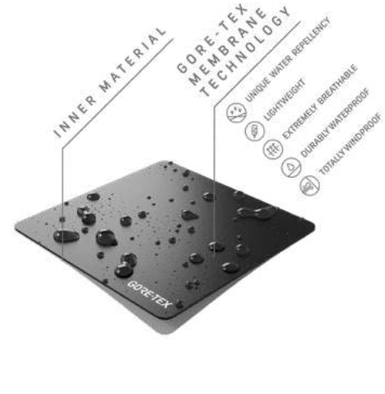

GORE-TEX SHAKEDRY™ GARMENTS

Through this technology the face fabric could be eliminated and a unique beading surface is created. This means no wetted out face fabric and constant water repellency and thus no additional weight pick-up. As the name says the garments shake dry.

Water Column: 23.000 mm
Breathability: RET < 3
Weight: 49 g/m²

TECHNOLOGY-SPECIFIC BENEFITS:

- Unique water repellency
- Extremely breathable
- Lightweight

DYNA-SHELL 2.5 LAYER

DYNA-SHELL fabrics are DYNAFIT's own performance fabrics for weather protection. The Dyna-Shell 2,5L fabric is a waterproof, windproof and breathable hard-shell material. The fabrics are very lightweight and breathable, allowing for optimum performance during endurance sports.

Water Column: 20.000 mm
Breathability: MVTR=20.000 g/m²/day

Waterproof Windproof Breathable

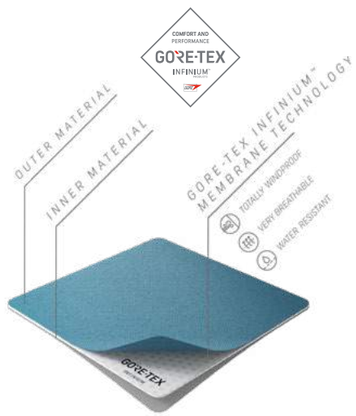

SOFTSHELLS

GORE-TEX INFINIUM™ WINDSTOPPER® GARMENTS

GORE-TEX products have long been known for waterproof protection. Under the name GORE-TEX INIFNIUM™ consumers can now find a wide range of high-performance non-waterproof product technologies. GORE-TEX INFINIUM™ WINDSTOPPER® garments are softshells that use a membrane technology to be totally windproof, water resistant, and very breathable.

BENEFITS:

- Totally windproof
- Water resistant
- Very breathable

DYNA-SHELL™ WINDPROOF

DYNA-SHELL WINDPROOF

The Dyna-Shell Windproof fabric is DYNAFITS's lightweight performance softshell material. Depending on the application, the softshell material uses either a windproof membrane technology or is so tightly woven that no wind can get through the fabric. Both versions are treated with a durable water repellent (DWR) finish, so that the surface repels water. The fabric nonetheless remains very breathable.

Windproof · Water Repellent · Breathable

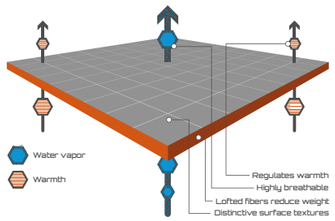

INSULATION & PADDINGS

POLARTEC® Alpha®

POLARTEC® ALPHA®

Polartec® Alpha® is an active insulation that enables moisture transport through the fabric to prevent overheating. At the same time, it keeps you warm and guarantees comfort. The main features of this technology are: it is breathable in all activities, dries quickly to minimize heat loss, insulates even when wet, it is machine washable and offers warmth at a low weight.

Composition: 100% PES
Weight: 60 g/m² and 100 g/m²

PRIMALOFT®

PrimaLoft® is the benchmark in performance of all synthetic insulations. It provides warmth without bulk, is water resistant, breathable, highly compressible. Moreover it is very light and has an exceptional feel. PrimaLoft® keeps you warm even when wet!

BENEFITS:

Water Resistant · Lightweight · Packable

PRIMALOFT® GOLD INSULATION

The best of the best with the highest warmth to weight ratio.

TECHNOLOGY-SPECIFIC BENEFITS:

Warmth without Bulk · 55% Recycled Content

PRIMALOFT® GOLD INSULATION HI-LOFT ULTRA WITH CROSS CORE™ TECHNOLOGY

PrimaLoft® Gold insulation enriched with Aerogel particles for an extra boost of warmth.

TECHNOLOGY-SPECIFIC BENEFITS:

High Loft · Loft Retention · Cross Core™ · 55% Recycled Content

PRIMALOFT® GOLD INSULATION LUXE™

Looks, feels and performs like down but even when wet.

TECHNOLOGY-SPECIFIC BENEFITS:

Warmth without Bulk · Superior Softness · 55% Recycled Content

PRIMALOFT® ACTIVE

An innovative textile platform that combines the thermal advantages of insulation with the versatility of fabric.

TECHNOLOGY-SPECIFIC BENEFITS:

Warmth without Bulk · 55% Recycled Content

DYNA-FILL® SYNTHETIC DOWN INSULATION

DYNA-FILL

DYNA-FILL insulation replicates the structure of down in a lightweight continuous synthetic insulation filament, offering warmth, packability, look & feel of down but with the advantage of synthetic insulation to keep you warm even when wet.

Clo® Insulation

CLO VELUTI VIVO INSULATION

The Clo® Veluti Vivo insulation provides the perfect balance between breathability and warmth. The insulation is penetrated by a series of small apertures that enhance breathability without decreasing the thermal performance of the insulation. These holes through the insulation trap air to create a fantastic warmth when in low activity, but also allow for the air and water vapor to flow through very quickly when the body temperature increases through high activity.

DOWN

All DYNAFIT products with down insulation use high-quality, ethically harvested White Goose down compiling with the Responsible Down Standard. The DWR treatment of Downtek™ ensures that the down is water resistant and that it maintains its insulation capability, even when it is exposed to snow, rain or sweat.

RESPONSIBLE DOWN STANDARD

100% of the down used for our products is certified based on the Responsible Down Standard (RDS). RDS is currently the most comprehensive, independent certification standard for animal welfare and traceability globally. It guarantees that ducks and geese are treated well for their lifetimes. The certification standard examines and scrutinises every step of the supply chain all the way down to animal farms.

RDS-certified means:
· NO live plucking
· NO force feeding of ducks and geese
· NO slaughtering of animals just for down and feathers
· YES for a transparent supply chain

DOWNTEK™

DownTek™ is a durable water-repellent down filling material, that effectively increases the performance of the garment, repelling water while maintaining loft and insulation value, even in the wettest of conditions. The DWR effect is obtained through a nano treatment that additionally provides antimicrobial and antibacterial protection.
DOWNTEK™.

- Retains 70% more loft than untreated down
- Dries five times faster
- Is PFOA and PFOS free
- Does not affect the fill power or compressibility of the garment
- Is machine washable and dryable with no degradation of the water repellency
- Dries five times faster

TECHNICAL FABRICS & FABRIC TREATMENTS

DYNA-SHELL ULTRALIGHT

Dyna-Shell Ultralight fabrics are ultra lightweight micro-denier woven nylon fabrics. Thanks to the tight weaving structure, the abrasion resistant fabric becomes almost completely windproof. Still, the fabrics have a soft touch and are breathable. They are especially used for ultra lightweight windbreakers or as the outer material of insulation jackets.

Wind Resistant · Water Repellent · Breathable

DYNASTRETCH

Thanks to their closely woven structure, the Dynastretch fabrics are very wind-resistant, yet remain stretchy. In addition, a durable water repellent (DWR) treatment has been applied to create a surface that repels water. Due to their abrasion resistance and breathability, Dynastretch fabrics of different weights are used for a wide range of applications: from ski touring pants, to hiking pants and shorts to wind breaker jackets.

Wind Resistant · Water Repellent · Breathable

POLARTEC® POWER GRID™

TECHNICAL FLEECE

Polartec® Power Grid™ fabrics are designed to keep your skin dry when you sweat. They feature a bi-component knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly. These fabrics weigh less, take up less pack space, and deliver more insulation and breathability than most fabrics in their class.

Composition: 100% PES
Pilling Resistance: 4/5
Snagging Resistance: 4/5

POLARTEC® POWER STRETCH® PRO™

CONTOURING FABRIC

Polartec® Power Stretch® Pro™ guarantees that products move back into their original shape after movement. Elastic fibers with enhanced resilience offer performance, fit and durability.

Composition: 54% PES, 34% PA, 12% EA
Pilling resistance: 4/5
Snagging resistance: 4/5

POLARTEC® THERMAL PRO®

ADVANCED FLEECE

Polartec® Thermal Pro® fleeces use technical fiber compositions that maintain a soft texture and air pockets for thermoregulation and breathability. Knit with premium polyester yarns, Thermal Pro® is cozy, resilient, and stylish.

Composition: 81% PL, 19% CYT

Dryarn

Dryarn® is an innovative microfiber, which is more breathable than polyester, more insulating than wool and lighter than any other fiber.

LIGHTNESS:

Dryarn® is super light – meaning that the fiber weights 32% less than wool and 34% less than Polyester.

THERMAL COMFORT:

Dryarn® offers excellent moisture transport to support a healthy microclimate on the skin. Sweat is immediately transported to the outside, so your body stays dry and warm in every conditions.

DRY SKIN:

Dryarn® is extremely breathable, evaporating sweat to the outside and preventing that the fabric gets soaked. Thus the body stays warm during normal and exhausting activities.

BACTERIOSTATIC:

Dryarn® is a naturally bacteriostatic fiber, it reduces the risk of irritation, allergies and rashes, as well as reducing odors.

S-TECH

S-Tech is a knit technology that enables our apparel engineers to develop seamless styles that include various textures and fibers – without the need to add seams, cutting or weight. Thanks to the seamless S-Tech construction, the elastic material adapts perfectly to the body. This provides increased freedom of movement, improved moisture management and an increased level of comfort.

MERINO WOOL

Merino wool is a renewable, natural raw material and comes from Merino sheep. Merino wool is known for its moisture wicking and insulation capabilities. It has odor neutralizing properties and is self-cleaning. In contrast to other new wool, it is particularly fine and soft, so it does not feel scratchy on the skin. The wool processed in our products comes from suppliers that guarantee mulesing-free sheep farming practices. In the DYNAFIT collection, merino fibers are combined with synthetic fibers to increase the durability and functionality. Adding polyester, elastane or polyamide fibers into the fabric makes the material more stretchable and increases tear resistance. In addition, merino synthetic fiber blends dry faster and improve moisture transport.

CARVICO

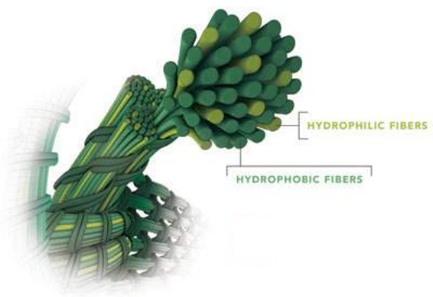

Carvico are Italian engineered stretch fabrics created for high performance athletic apparel. They can correctly sustain muscles, increasing efficiency of movement and reducing muscle fatigue.
- 4 Way stretch
- Quick drying
- Extremely high pilling and abrasion resistance

DRIRELEASE®

A patented performance sports material that has the look and feel of classic cotton, but keeps you dry, cool, comfortable and fresh. drirelease fabrics offer a patented blend of 85-90% synthetic, hydrophobic (water repelling) fibers and 10-15% natural, hydrophilic (water

absorbing) fibers. The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the

fabric where it can evaporate quickly. That's why clothing made with DR always feels soft and stays dry.

POLYGIENE®

Polygiene is a permanent odor control garment treatment. It prevents the growth of odor-causing bacteria and fungi at the source. A low concentration of silver salt which has antimicrobial properties is integrated in the fabric. It is not nanosilver and is only active on the textiles itself. The treatment is bluesign® approved which means it meets rigorous independent environmental and product life cycle standards.

APPAREL

PACKABLE
Product packs small.

BREATHABLE
Breathable performance fabric.

WINDPROOF
Performance fabric with a windproof membrane.

WIND-RESISTANT
A tightly woven fabric keeps out most wind and at the same time enables good ventilation.

WATERPROOF
Performance fabric with a waterproof membrane and sealed seams.

WATER-REPELLENT
Performance fabric with water repellency.

4-WAY-STRETCH
Performance fabric with 4-way stretch for great freedom of movement.

EXPANDABLE BACK
When opened, the zipper on the back allows carrying a pack under the jacket.

ACTIVE AIRFLOW VENTILATION
Laser-perforated openings under the arm or on the back increase ventilation.

QUICK DRY
Extra quick-drying performance fabric.

EQUIPMENT

SPEED POLE FIXATION
Pole attachments on the side of a pack. Poles tips are placed in a special pocket and lashed onto the pack using an elastic cord.

POLE FIXATION
Performance fabric with a waterproof membrane and sealed seams.

COMPRESSION STRAP
Pulling on a strap to tighten it compresses the pack to a minimum volume, depending on contents.

SAFETY BOX
An easily accessible pocket with hook-and-loop closures on the bottom of the pack allows access to pack contents without needing to take it off.

WIND SHIELD
An integrated wind shield in the upper left pocket on the shoulder strap can be used if needed to protect the upper body from wind.

ADJUSTABLE POLE LENGTH
Poles are variable in length and can be adjusted from 115 to 135 cm, depending on the use and user height.

ROLL TOP
A practical roll-top closure adapts to various quantities and always remains securely shut.

FOOTWEAR

ALPINE ROCKER
The rocker midsole has a rocker shape that results in fluid and dynamic heel-to-toe running motion.

INVSIBLE LACING
Stretch fabric lace cover to protect laces from wear-and-tear and to keep out debris such as leaves and stones.

POMOCA GLIDING PATH
A special S-shaped tread pattern – the “gliding path” – facilitates a natural roll-through of the foot, ensures a seamless push-off, and reduces elastic deformation for better shape retention. A traction zone alongside the gliding path offers good footing on varying terrain.

VIBRAM LUGS
Special design of Vibram Lugs - lugs adapt individually to the ground for better traction.

DNA VOLUME REDUCER
DNA FEATURE: spare insole that reduces the volume of the shoe - for a slimmer and tighter race fit.

ADAPTIVE TONGUE/FIT SYSTEM
3 layer construction made with parachute material - wraps foot and adapts fit while running - added on top of the seamless tongue.

SEAMLESS TONGUE
seamless tongue construction to eliminate chafing and reduce weight.

MAXIMUM CUSHIONING
Maximum cushioning for maximum running comfort.

CSR

PFC-FREE
PFC free durable water repellent finishing.

MADE WITH RECYCLED CONTENT
Styles containing at least 50% recycled content in their main fabric.

MADE IN EUROPE
Produced in Europe.

RDS
Independent certification of 100% responsibly sourced down.

ORGANIC COTTON
Cotton from certified organic farms that do not use pesticides or synthetic fertilizers.

ICON INDEX

B2B PORTAL

DYNAFIT AT YOUR FINGERTIPS

Our B2B portal is an online shop for business customers. In comparison to email or faxed orders, the platform offers an overview of real-time availability because the system is connected to our inventory management system and is updated daily. Every retailer who has been given access by us can place orders around the clock and can download marketing materials such as images, videos, workbooks, and much more. Website: serviceportal.oberalp.biz

WHY YOU SHOULD USE OUR B2B PORTAL

- Ability to order any time of the day or night, regardless of our office hours
- Deliveries FOB without any minimums
- Simple overview of available sizes and colours
- Easy, timely, and quick processing – without the need to hold on a call
- Opportunity to print or electronically archive all orders
- Downloading of images, product descriptions, price lists, catalogues (PDF format), and videos
- Ability to track shipments of orders placed
- Overview of all orders, whether placed on the B2B portal or elsewhere

HOW TO REGISTER FOR THE B2B PORTAL

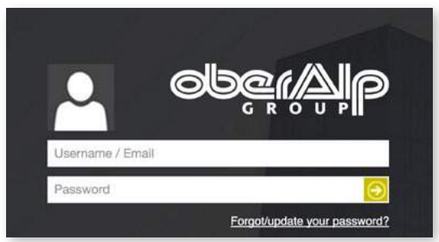

1

Open a web browser to our home page dynafit.com. In the footer area, on the right side, select “B2B / PRESS PORTAL”, or input the web address serviceportal.oberalp.biz into your browser.

2

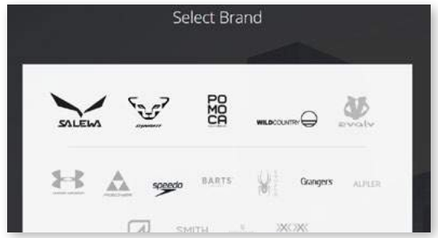

Fill out the new customer registration form with all the necessary information. Within 24 hours, you will receive your login details for access.

3

At serviceportal.oberalp.biz, a dialogue box will appear to request your login details. Input your user name and password. Click on “Log in”.

4

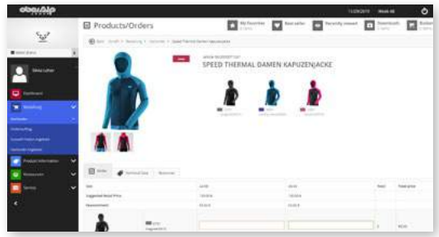

In the B2B portal, we offer all products of the OBERALP Group available for each country. First, choose the collection from which you want to order by clicking on the brand. You can select any collection for which you have access.

5

You are able to search for products by clicking on “Order” in the “Products/Orders” section and then inputting the product name (a part of the name is usually sufficient) or the product number. Click on “Search” to show all relevant search results.

6

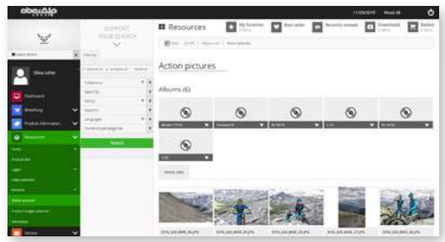

Click on an article and then you will see in the next overview whether the article is available in the different colors. When the box is bordered in green, the product has immediate availability and there are usually at least 10 pieces in stock. If the quantity in stock is less than 10, the box is bordered in orange. If the product is not available immediately but will be available for shipping in the next four weeks or less, a small “i” is visible in each box with the estimated week of delivery. If a specific size is not shown, it is no longer available. Simply input your desired quantity in the box, and then click on “Add to my cart”.

7

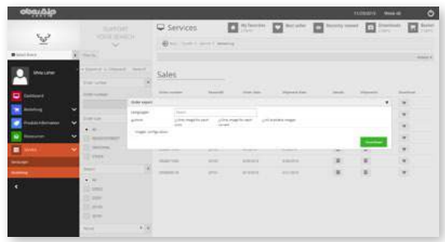

Repeat steps 5 and 6 for each article you would like to order. Your orders will be placed in your cart. To finalise your order, click on your card and select “Place my order”. After inputting a delivery address, if it is different, click on “Confirm order” to complete the transaction. You will receive an order summary by email.

8

You can also download product images, action shots, workbooks, logos, videos, and our Service Guide. For any of those, just click on the left menu area on “Resources” and open the desired menu item. There, you can download a wide variety of materials.

9

Afterward, you can look at your order again, print it out, or download the associated product images for your order. Click here on “Service” and “Order”. Here, you see all of your orders. Clicking on “Download” allows you to download your order sheet or the associated product images.
